### How did the Fund perform last year?

**Access Flex High Yield ProFund** (the "Fund") seeks to provide investment results that correspond generally to the total return of the high yield market consistent with maintaining reasonable liquidity.

The Fund invests primarily in financial instruments that ProFund Advisors believes, in combination, should provide investment results that correspond generally to the high yield market. During the period, the index performance was driven in part by tightening spreads that offset a modest decline in yields.

For the year ended July 31, 2025, the Markit iBoxx \$ Liquid High Yield Index, a widely used measure of high yield market performance had a total return of 8.85%.

Primary factors affecting Fund performance include the total return of the derivatives held by the Fund, the performance of the reference assets to which the derivatives are linked, financing rates paid or earned, the types of derivative contracts used (and their correlation to the high yield market), expenses, transaction costs, the impact of compounding, and other miscellaneous factors.

### Total Return Based on a \$10,000 Investment

Cumulative performance: August 1, 2015 through July 31, 2025

The chart above represents historical performance of a hypothetical investment of \$10,000 in the Fund over the past ten years (or since inception if shorter), assuming the reinvestment of distributions.
