How did the Fund perform last year?

Bull ProFund (the "Fund") seeks daily investment results, before fees and expenses, that tracks performance of the S&P 500® Index (the "Index").

The Fund invests in financial instruments that ProFund Advisors believes, in combination, should track the performance of the Index.

For the year ended July 31, 2025, the Fund had an average daily statistical correlation of over 0.99 to the daily performance of the Index. For the same period, the Index had a total return of 16.33% and a volatility of 19.45%. The index performance was driven by technology outperformance which fueled strong returns.

Primary factors affecting Fund performance include the total return of the securities and derivatives held by the Fund, the performance of the reference assets to which the derivatives are linked, financing rates paid or earned, types of derivative contracts used (and their correlation to the Fund's Index), expenses, transaction costs, the volatility of the Fund's Index, and other miscellaneous factors.
