### What were the Fund's costs for the last year?

(based on a hypothetical \$10,000 investment)

| Class Name    | Costs of a \$10,000 investment | Costs paid as a percentage of a \$10,000 investment |
|---------------|--------------------------------|-----------------------------------------------------|
| Service Class | \$278                          | 2.78%                                               |

### How did the Fund perform last year?

**Mid-Cap ProFund** (the "Fund") seeks investment results, before fees and expenses, that track the performance of the S&P MidCap 400® Index (the "Index").

The Fund invests in financial instruments that ProFund Advisors believes, in combination, should track the performance of the Index.

For the year ended July 31, 2025, the Fund had an average daily statistical correlation of over 0.99 to the daily performance of the Index. For the same period, the Index had a total return of 3.27% and a volatility of 21.61%. The index performance was driven by mid-caps lagging during a period of mega cap outperformance.

Primary factors affecting Fund performance include the total return of the securities and derivatives held by the Fund, the performance of the reference assets to which the derivatives are linked, financing rates paid or earned, the types of derivative contracts used (and their correlation to the Fund's Index), expenses, transaction costs, the volatility of the Fund's Index, and other miscellaneous factors.

### Total Return Based on a \$10,000 Investment

Cumulative performance: August 1, 2015 through July 31, 2025

The chart above represents historical performance of a hypothetical investment of \$10,000 in the Fund over the past ten years (or since inception if shorter), assuming the reinvestment of distributions.
