Class Name	Costs of a \$10,000 investment	Costs paid as a percentage of a \$10,000 investment
Service Class	\$281	2.78%

How did the Fund perform last year?

Short Small-Cap ProFund (the "Fund") seeks daily investment results, before fees and expenses, that correspond to the inverse (-1x) of the daily performance of the Russell 2000® Index (the "Index").

The Fund invests in financial instruments that ProFund Advisors believes, in combination, should produce daily returns consistent with the Fund's investment objective.

For the year ended July 31, 2025, the Fund had an average daily statistical correlation of over 0.99 to the inverse of the daily performance of the Index. For the same period, the Index had a total return of -0.55% and a volatility of 24.19%. The index performance was driven by small caps lagging during a period of mega cap outperformance.

Primary factors affecting Fund performance include the total return of the derivatives held by the Fund, the performance of the reference assets to which the derivatives are linked, financing rates paid or earned, the types of derivative contracts used (and their correlation to the Index), expenses, transaction costs, the volatility of the Fund's Index, the impact of compounding, and other miscellaneous factors.
