Investor Class	\$187	1.78%

How did the Fund perform last year?

Access Flex High Yield ProFund (the "Fund") seeks to provide investment results that correspond generally to the total return of the high yield market consistent with maintaining reasonable liquidity. The Fund invests primarily in financial instruments that ProFund Advisors believes, in combination, should provide investment results that correspond generally to the high yield market. During the period, tightening credit spreads overcame the impact of rising risk-free rates, driving returns. For the year ended July 31, 2024, the Markit iBoxx \$ Liquid High Yield Index, a widely used measure of high yield market performance, had a total return of 10.82%. Primary factors affecting Fund performance include the total return of the derivatives held by the Fund, the performance of the reference assets to which the derivatives are linked, financing rates paid or earned, the types of derivative contracts used (and their correlation to the high yield market), expenses, transaction costs, and other miscellaneous factors.

Cumulative performance: November 1, 2014 through July 31, 2024

Total Return Based on \$10,000 Investment

The chart above represents historical performance of a hypothetical investment of \$10,000 in the Fund over the past ten years (or since inception if shorter). Performance data quoted represents past performance and does not guarantee future results. Returns shown are total returns, which assume the reinvestment of dividends and capital gains. The table and graph presented above do not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of fund shares.
