How did the Fund perform last year?

Short Bitcoin ProFund (the "Fund") seeks daily investment results, before fees and expenses, that correspond to the inverse (-1x) of the daily performance of the Bloomberg Bitcoin Index (the "Index").

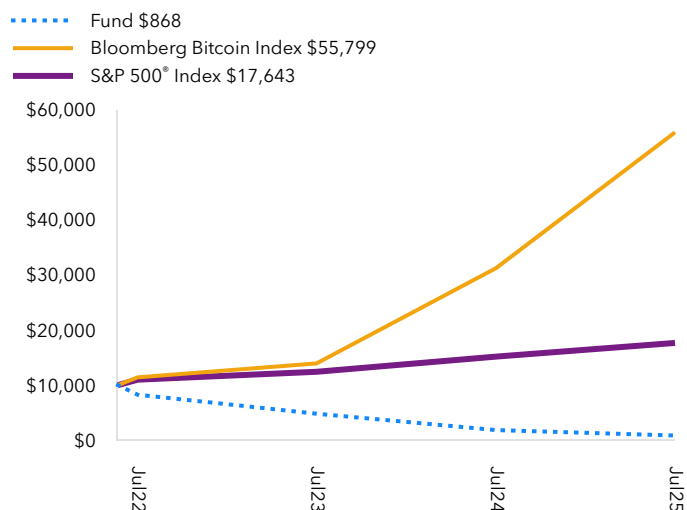

The Fund invests in financial instruments that ProFund Advisors believes, in combination, should produce daily returns consistent with the Fund's investment objective. The index performance was driven by strong bitcoin performance which significantly outperformed Ether.

For the year ended July 31, 2025, the Fund had a total return of -53.14%. For the same period, the Index had a total return of 78.85%.

Primary factors affecting Fund performance include the total return of the derivatives held by the Fund, the performance of the reference assets to which the derivatives are linked, financing rates paid or earned, the types of derivative contracts used, expenses, transaction costs, the volatility of the Fund's Index, the impact of compounding, and other miscellaneous factors.
