

Annual Report

DECEMBER 31, 2018

Access One Trust

Access VP High Yield Fund®

Beginning on January 1, 2021, as permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's annual and semiannual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Fund's website at ProFunds.com, and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund electronically anytime by contacting your financial intermediary (such as banks & insurance companies).

Beginning on January 1, 2019, you may elect to receive all future reports in paper free of charge. Please contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held in your account that you invest in through your financial intermediary.

Message from the Chairman

Dear Shareholder:

I am pleased to present the Access VP High Yield Fund annual report to shareholders for the 12 months ended December 31, 2018.

Reversal in Market Sentiment Drives Declines in High Yield Bonds

The U.S. high yield market declined 1.5% for the period, as measured by the Markit iBoxx[®] \$ Liquid High Yield Index. Volatility made a notable comeback to financial markets in 2018 as fears of higher inflation spooked investors early in the year. But markets settled as the year wore on, as strong U.S. economic fundamentals, healthy corporate profits and rising oil prices drove stock prices higher. Strong economic growth also stoked inflation higher, and interest rates rose as the Federal Reserve (Fed) followed through on its plans to hike short-term interest rates four times in 2018. However, investor sentiment reversed sharply in the fourth quarter, when concerns about slowing global growth, the sustainability of U.S. growth, plunging oil prices and ongoing trade tensions triggered a global flight to quality. Additionally, the Fed outlook that accompanied its fourth rate hike in December, which called for potentially two rate hikes in 2019, was viewed by investors as too optimistic and triggered safe-haven buying.

Yields in the high-yield market increased sharply during the period. The JPMorgan Domestic High Yield Summary Yield to Maturity opened the year at 6.5% in January and closed December up at 8.3%.

Overall, U.S. fixed income results were flat, as measured by the Barclays U.S. Aggregate Bond Index[®]. While shorter-term Treasuries rose, with the Ryan Labs 5 Year Treasury Index up

1.4%, longer-term and higher-quality debt registered declines. The Ryan Labs 10 Year Treasury Index was flat, but the Ryan Labs 30 Year Treasury Index fell by 2.6%, and corporate investment-grade credit was down 3.7%, as measured by the Markit iBoxx[®] \$ Liquid Investment Grade Index.

Economic Growth Positive

The U.S. economy grew at a revised 3.4% annual rate in the third quarter, slightly below previous estimates, after growing 4.2% in the second quarter, the strongest pace in four years. Third-quarter growth was driven primarily by personal consumption, business investment and government spending. Jobs and wage data continued to be positive. The unemployment rate was 3.9% in December, down from 4.1% last year. Average hourly earnings also improved, increasing by 5.0% in 2018.

Access VP High Yield

The Access VP High Yield Fund returned -0.6% for the 12 months ended December 31, 2018, outperforming the high yield market overall. However, the fund experienced negative flows as investors fled to safer investments in the late-year flight to quality.

We appreciate the trust you have placed in us by choosing the Access VP High Yield Fund and look forward to continuing to serve your investing needs.

Sincerely,

Michael L. Sapir
Chairman of the Board of Trustees

This Page Intentionally Left Blank

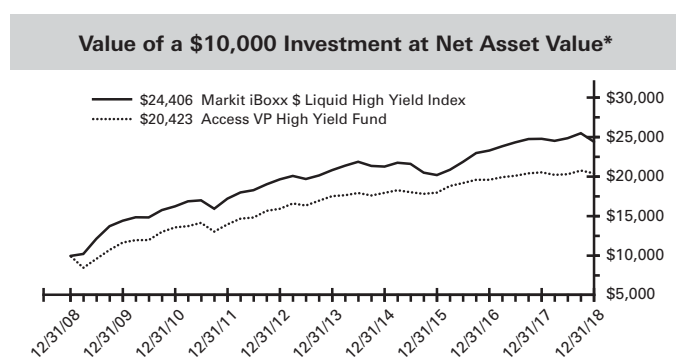

Management Discussion of Fund Performance

This Page Intentionally Left Blank

The Access VP High Yield Fund seeks to provide investment results that correspond generally to the total return of the high yield market, consistent with maintaining reasonable liquidity. However, the Fund does not seek to match the daily returns of a specific benchmark. For the year ended December 31, 2018, the Fund had a total return of -0.61%. For the same period, the Markit iBoxx \$ Liquid High Yield Index, a widely used measure of high yield market performance, had a total return of -1.51%¹. The total return for the 5-year U.S. Treasury Note was 1.41%².

Access VP High Yield Fund is designed to maintain exposure to the high yield market, regardless of market conditions. This means the Fund does not adopt defensive positions in anticipation of an adverse market climate. The Access VP High Yield Fund seeks to achieve its high yield exposure primarily through credit default swaps (CDS) and 5-year treasury exposure but may also invest in high yield debt instruments (commonly referred to as junk bonds), other debt, money market instruments, total return swap agreements and futures contracts.

During the year ended December 31, 2018, the Fund invested in credit default swap agreements and futures contracts as a substitute for investing directly in high yield bonds. These derivatives generally tracked the performance of their underlying benchmark and were negatively impacted by financing costs associated with their use. The Fund entered into credit default swap agreements that were centrally cleared. In a centrally cleared swap agreement, the clearing organization takes on the credit risk of all parties involved in the trade, and in effect, guarantees each party's obligation under the contract. As a result, each party involved in a centrally cleared contract only faces the clearing organization. There can be no assurance, however, that the clearing organization, or its members, will satisfy its obligations to the Fund.

* The line graph represents the historical performance of a hypothetical investment of \$10,000 in the Access VP High Yield Fund from December 31, 2008 to December 31, 2018, assuming the reinvestment of distributions.

Average Annual Total Return as of 12/31/18

Fund	One Year	Five Year	Ten Year
Access VP High Yield Fund	-0.61%	3.08%	7.40%
Markit iBoxx \$ Liquid High Yield Index	-1.51%	3.22%	9.33%

Expense Ratios**

Fund	Gross	Net
Access VP High Yield Fund	1.71%	1.68%

** Reflects the expense ratio as reported in the Prospectus dated May 1, 2018. Contractual fee waivers are in effect through April 30, 2019. See Financial Highlights for effective expense ratios.

Allocation of Portfolio Holdings & Composition

Market Exposure		Holdings	Industry Exposure	
Investment Type	% of Net Assets			% of Market Exposure (CDS)
U.S. Treasury Obligation	52%	The Access VP High Yield Fund primarily invests in non-equity securities, which may include: credit default swap agreements, futures contracts, repurchase agreements, U.S. Government and money market securities.	Consumer Cyclical	25%
Futures Contracts	11%		Consumer Non-Cyclical	14%
Credit Default Swap Agreements	81%		Communications	12%
			Financial	11%
			Energy	11%
			Basic Materials	9%
			Industry	7%
			Technology	6%
			Utilities	5%

"Market Exposure" includes the value of total investments (including the contract value of any derivatives) and excludes any instruments used for cash management.

Past performance does not guarantee future results. Return calculations assume the reinvestment of distributions and do not reflect taxes that a shareholder would pay on Fund distributions or on the redemption of Fund shares. The performance data quoted represents past performance and current returns may be lower or higher. The investment return and net asset value will fluctuate so that an investor's shares, when redeemed, may be worth more or less than the original cost. The performance above reflects any fee reductions during the applicable periods. If such fee reductions had not occurred, the quoted performance would be lower. Performance numbers are net of all Fund fees and expenses but do not include any insurance, sales, or administrative charges of variable annuity or life insurance contracts. If these charges were included, the returns would be lower. To obtain performance current to the most recent month-end, please call toll-free 888-776-3637.

¹ The graph and table reflect the theoretical reinvestment of dividends on securities in the Index. The impact of transaction costs and the deduction of expenses associated with a mutual fund, such as investment management and accounting fees, are not reflected in the Index calculations. The Fund's performance reflects the reinvestment of dividends as well as the impact of transaction costs and the deduction of fees and expenses. It is not possible to invest directly in an index.

² The 5-year U.S. Treasury Note reflects both price return and yield components. It does not reflect the impact of transaction and financing costs, nor the deduction of expenses associated with a mutual fund, such as investment management and accounting fees.

Investments in high yield bonds or in investments linked to the high yield market are subject to greater volatility and greater credit risks than investing in U.S. Treasuries. U.S. Treasury instruments are guaranteed by the U.S. government as to the timely payment of principal and interest, if held to maturity. Both the principal and yield of a mutual fund will fluctuate with changes in market conditions.

The above information is not covered by the Report of the Independent Registered Public Accounting Firm.

Expense Examples

This Page Intentionally Left Blank

As a Fund shareholder, you may incur two types of costs: (1) transaction costs and (2) ongoing costs, including management fees; distribution fees; and other Fund expenses. These examples are intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing cost of investing in other mutual funds. Please note that the expenses shown in the table below are meant to highlight your ongoing costs only and do not reflect any transactional costs. If these transactional costs were included, your costs would have been higher. These examples also do not reflect fees associated with insurance company or insurance contracts. If these fees were reflected, expense would be higher. Therefore, these examples are useful in comparing ongoing costs only and will not help you determine the relative total cost of owning different funds.

Actual Expenses

The actual examples are based on an investment of \$1,000 invested at the beginning of a six-month period and held through the period ended December 31, 2018.

The columns below under the heading entitled “Actual” provide information about actual account values and actual expenses. You may use this information, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the table under the heading entitled “Actual Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

Hypothetical Expenses for Comparison Purposes

The hypothetical expense examples are based on an investment of \$1,000 invested at the beginning of a six-month period and held through the period ended December 31, 2018.

The columns below under the heading entitled “Hypothetical” provide information about hypothetical account values and hypothetical expenses based on each Fund’s actual expense ratio and as assumed rate of return of 5% per year before expenses, which is not each Fund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in your Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

			Actual		Hypothetical (5% return before expenses)	
	Annualized Expense Ratio During Period	Beginning Account Value 7/1/18	Ending Account Value 12/31/18	Expenses Paid During Period*	Ending Account Value 12/31/18	Expenses Paid During Period*
Access VP High Yield Fund	1.65%	\$1,000.00	\$1,005.30	\$8.34	\$1,016.89	\$8.39

* Expenses are equal to the average value, multiplied by the Fund’s annualized expense ratio multiplied by 184/365 (the number of day in the most recent fiscal half-year divided by the number of days in the fiscal year).

Futures Contracts Purchased

	Number of Contracts	Expiration Date	Notional Amount	Value and Unrealized Appreciation/ (Depreciation)
5-Year U.S. Treasury Note Futures Contracts	16	4/1/19	\$1,834,625	\$3,741

Centrally Cleared Swap Agreements

Credit Default Swap Agreements — Sell Protection^(a)

Underlying Instrument	Payment Frequency	Fixed Deal Receive Rate	Maturity Date	Implied Credit Spread at December 31, 2018 ^(b)	Notional Amount ^(c)	Value	Premiums Paid (Received)	Unrealized Appreciation/ (Depreciation)	Variation Margin
CDX North America High Yield Index Swap Agreement; Series 31	Daily	5.00%	12/20/23	4.46%	\$13,000,000	\$271,562	\$938,262	\$(666,700)	\$23,058

^(a) When a credit event occurs as defined under the terms of the swap agreement, the Fund as a seller of credit protection will either (i) pay to the buyer of protection an amount equal to the par value of the defaulted reference entity and take delivery of the reference entity or (ii) pay a net amount equal to the par value of the defaulted reference entity less its recovery value.

^(b) Implied credit spread, represented in absolute terms, utilized in determining the value of the credit default swap agreements as of period end will serve as an indicator of the current status of the payment/performance risk and represent the likelihood or risk of default or other credit event for the credit derivative. The implied credit spread of a referenced entity reflects the cost of buying/selling protection and may include payments required to be made to enter into the agreement. Generally, wider credit spreads represent a perceived deterioration of the referenced entity's credit soundness and a greater likelihood or risk of default or other credit event occurring as defined under the terms of the swap agreement.

^(c) The notional amount represents the maximum potential amount the Fund could be required pay as a seller of credit protection if a credit event occurs, as defined under the terms of the swap agreement, for each security included in the CDX North America High Yield Index.

Supplemental Data:					
Net assets, end of period (000's)	\$16,054	\$25,713	\$61,327	\$21,343	\$ 30,335
Portfolio turnover rate ^(d)	1,539%	1,407%	1,809%	1,470%	1,361%

^(a) Per share net investment income (loss) has been calculated using the average daily shares method.

^(b) During the year ended December 31, 2014, the Advisor voluntarily contributed capital of \$6,811 in the Fund due to corrections of investment transactions. The contribution represented less than \$0.005 to the NAV and 0.02% to the total return. Without this contribution, the total return would have been lower.

^(c) During 2018, the Fund received a non-recurring reimbursement from a third party relating to expenses that were incurred in a prior year. Had this reimbursement not occurred, the net expense ratio and net investment income (loss) ratio would have been 1.67% and 0.57%, respectively, and the total return would have been (0.62)%.

^(d) Portfolio turnover rate is calculated without regard to instruments having a maturity of less than one year from acquisition or derivative instruments (including swap agreements and futures contracts.) The portfolio turnover rate can be high and volatile due to the amount and timing of sales and purchases of fund shares during the period.

See accompanying notes to the financial statements.

This Page Intentionally Left Blank

Notes to Financial Statements

This Page Intentionally Left Blank

1. Organization

The Access One Trust (the “Trust”) consists of three separate investment portfolios and is registered as an open-end management investment company under the Investment Company Act of 1940 (the “1940 Act”) and thus follows accounting and reporting guidance for investment companies. The Trust is organized as a Delaware statutory trust and is authorized to issue an unlimited number of shares of beneficial interest of no par value which may be issued in more than one class or series. The accompanying financial statements relate to the Access VP High Yield Fund (the “Fund”) which is classified as non-diversified under the 1940 Act. The Fund has one class of shares.

Under the Trust’s organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Trust. In addition, in the normal course of business, the Trust enters into contracts with its vendors and others that provide for general indemnifications. The Trust and Fund’s maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund.

2. Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements. These policies are in conformity with U.S. generally accepted accounting principles (“GAAP”). The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. The actual results could differ from those estimates.

Investment Valuation

The Fund records its investments at fair value. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The valuation techniques used to determine fair value are further described in Note 3.

Repurchase Agreements

The Fund may enter into repurchase agreements with financial institutions in pursuit of its investment objective, as “cover” for the investment techniques it employs, or for liquidity purposes. Repurchase agreements are primarily used by the Fund as short-term investments for cash positions. Under a repurchase agreement, the Fund purchases a debt security and simultaneously agrees to sell the security back to the seller at a mutually agreed-upon future price and date, normally one day or a few days later. The resale price is greater than the purchase price, reflecting an agreed-upon market interest rate during the purchaser’s holding period. While the maturities of the underlying securities in repurchase transactions may be more than one year, the term of each repurchase agreement will always be less than one year.

The Fund follows certain procedures designed to minimize the risks inherent in such agreements. These procedures include effecting repurchase transactions generally with major, global

financial institutions whose creditworthiness is continuously monitored by ProFund Advisors LLC (the “Advisor”). In addition, the value of the collateral underlying the repurchase agreement will always be at least equal to the repurchase price, including any accrued interest earned on the repurchase agreement. Funds within both the Trust and ProFunds (an affiliated trust) invest in repurchase agreements jointly. The Fund, therefore, holds a pro rata share of the collateral and interest income based upon the dollar amount of the repurchase agreements entered into by the Fund. The collateral underlying the repurchase agreement is held by the Fund’s custodian. In the event of a default or bankruptcy by a selling financial institution, the Fund will seek to liquidate such collateral which could involve certain costs or delays and, to the extent that proceeds from any sale upon a default of the obligation to repurchase were less than the repurchase price, the Fund could suffer a loss. The Fund also may experience difficulties and incur certain costs in exercising its rights to the collateral and may lose the interest the Fund expected to receive under the repurchase agreement. During periods of high demand for repurchase agreements, the Fund may be unable to invest available cash in these instruments to the extent desired by the Advisor.

Information concerning the counterparties, value of, collateralization and amounts due under repurchase agreement transactions may be found on the Fund’s Schedule of Portfolio Investments.

Derivative Instruments

The Fund maintains exposure to the high yield market (i.e., U.S. corporate high yield debt market), regardless of market conditions. This means the Fund does not adopt defensive positions in cash or other instruments in anticipation of an adverse market climate. The Fund invests primarily in derivatives, money market instruments, and U.S. Treasury obligations that the Advisor believes, in combination, should provide investment results that correspond to the high yield market. During the year ended December 31, 2018, the Fund held credit default swap agreements for credit exposure to the high yield market and futures contracts and treasury notes for interest rate exposure to meet the Fund’s investment objective.

All open derivative positions at year end are reflected on the Fund’s Schedule of Portfolio Investments. The volume associated with derivative positions varies on a daily basis as the Fund transacts in derivative contracts in order to achieve the appropriate exposure, as expressed in notional amount, in comparison to net assets consistent with the Fund’s investment objective. The notional amount of open derivative positions relative to the Fund’s net assets at year end is generally representative of the notional amount of open positions to net assets throughout the reporting period.

The Advisor is registered as a commodity pool operator (a “CPO”) under the Commodity Exchange Act (“CEA”), in connection with its management of certain funds outside of the Trust. The Advisor also registered as a commodity trading advisor (a “CTA”) under the CEA as a result of its role as subadvisor to funds outside the Trust. However, in connection with its management of the Fund, the Advisor has claimed an exclusion from the definition of CPO under the CEA, pursuant to Commodities Futures Trading Commission (“CFTC”) Regulation 4.5 due to the Fund’s limited trading in commodity interests. Accordingly, with respect to the Fund, the Advisor is not subject to registration or regulation as a

CPO under the CEA. To remain eligible for the exclusion, the Fund will be limited in its ability to use certain financial instruments regulated under the CEA (“commodity interests”), including certain swap transactions (as well as futures). In the event that any of the Fund’s investments in commodity interests are not within the thresholds set forth in the exemption, the Advisor will not be able to rely on the exclusion, and will be required to comply with the additional recordkeeping, reporting, and disclosure requirements with respect to the Fund. The Advisor’s eligibility to claim the exclusion with respect to the Fund is based upon, among other things, the level and scope of the Fund’s investment in commodity interests, the purpose of such investments and the manner in which the Fund holds out its use of commodity interests. The Fund’s ability to invest in commodity interests (including, but not limited to swaps and futures on broad-based securities indexes and interest rates) is limited by the Advisor’s intention to operate the Fund in a manner that would permit the Advisor to continue to claim the exclusion, which may affect the Fund’s total return. In the event the Advisor becomes unable to rely on the exclusion and is required to register with the CFTC as a CPO with respect to the Fund, the Fund’s expenses may increase, adversely affecting the Fund’s return.

The following is a description of the derivative instruments utilized by the Fund, including certain risks related to each instrument type.

Swap Agreements

As of December 31, 2018, the Fund invested in centrally cleared credit default swaps as a substitute for investing directly in bonds in order to gain credit exposure to the high yield market.

In a credit default swap (“CDS”), the agreement will reference one or more debt securities or reference entities. The protection “buyer” in a credit default contract is generally obligated to pay the protection “seller” a periodic stream of payments over the term of the contract until a credit event, such as a default, on a reference entity has occurred. If a credit event occurs, the seller generally must pay the buyer: a) the full notional value of the swap; or b) the difference between the notional value of the defaulted reference entity and the recovery price/rate for the defaulted reference entity. CDS are designed to reflect changes in credit quality, including events of default. A CDS may require premium (discount) payments as well as daily payments (receipts) related to the interest leg of the swap or to the default or change in price of a reference entity.

The counterparty risk for cleared swap agreements is generally lower than for over-the-counter swap agreements because, generally, a clearing organization becomes substituted for each counterparty to a cleared swap agreement and, in effect, guarantees each party’s performance under the contract as each party to a trade looks only to the clearing organization for performance of financial obligations. However, there can be no assurance that the clearing organization, or its members, will satisfy its obligations to the Fund.

If the Fund is a seller of a CDS contract (also referred to as a seller of protection or as a buyer of risk), the Fund would be required to pay the par (or other agreed upon) value of a referenced obligation to the counterparty in the event of a default or other credit event. In return, the Fund would receive from the

counterparty a daily stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the Fund would keep the stream of payments and would have no payment obligations. As the seller, the Fund would be subject to investment exposure on the notional amount of the swap.

If the Fund is a buyer of a CDS contract (also referred to as a buyer of protection or a seller of risk), the Fund would have the right to deliver a reference obligation and receive the par (or other agreed-upon) value of such obligation from the counterparty in the event of a default or other credit event (such as a credit downgrade). In return, the Fund would pay the counterparty a daily stream of payments over the term of the contract provided that no event of default has occurred. If no default occurs, the counterparty would keep the stream of payments and would have no further obligations to the Fund.

The Fund enters into a CDS with multiple reference entities, in which case payments and settlements in respect of any defaulting reference entity would typically be dealt with separately from the other reference entities.

Upon entering into a centrally cleared CDS, the Fund may be required to deposit with the broker an amount of cash or cash equivalents in the range of approximately 3% to 6% of the notional amount for CDS on high yield debt issuers (this amount is subject to change by the clearing organization that clears the trade). This amount, known as “initial margin,” is in the nature of a performance bond or good faith deposit on the CDS and is returned to the Fund upon termination of the CDS, assuming all contractual obligations have been satisfied. Subsequent payments, known as “variation margin,” to and from the broker will be made daily as the price of the CDS fluctuates, making the long and short positions in the CDS contract more or less valuable, a process known as “marking-to-market.” The premium (discount) payments are built into the daily price of the CDS and thus are amortized through the variation margin. The variation margin payment also includes the daily portion of the periodic payment stream.

The use of swaps is a highly specialized activity which involves investment techniques and risks in addition to and in some cases different from those associated with ordinary portfolio securities transactions. The primary risks associated with the use of swap agreements are mispricing or improper valuation, imperfect correlation between movements in the notional amount and the price of the underlying investments, and the inability of the counterparties or clearing organization to perform. If a counterparty’s creditworthiness for an over-the-counter swap declines, the value of the swap would likely decline. The Advisor, under the supervision of the Trust’s Board of Trustees, is responsible for determining and monitoring the liquidity of the Fund’s transactions in swap agreements.

Futures Contracts

The Fund may purchase or sell futures contracts as a substitute for a comparable market position in the underlying securities or to satisfy regulatory requirements. As of December 31, 2018, the Fund held cash-settled U.S. Treasury note futures contracts.

A cash-settled futures contract obligates the seller to deliver (and the purchaser to accept) an amount of cash equal to a specific dollar amount (the contract multiplier) multiplied by the difference between the final settlement price of a specific futures contract and the price at which the agreement is made. No physical delivery of the underlying asset is made.

The Fund generally engages in closing or offsetting transactions before final settlement of a futures contract, wherein a second identical futures contract is sold to offset a long position (or bought to offset a short position). In such cases, the obligation is to deliver (or take delivery of) cash equal to a specific dollar amount (the contract multiplier) multiplied by the difference between the price of the offsetting transaction and the price at which the original contract was entered into. If the original position entered into is a long position (futures contract purchased), there will be a gain (loss) if the offsetting sell transaction is carried out at a higher (lower) price, inclusive of commissions. If the original position entered into is a short position (futures contract sold), there will be a gain (loss) if the offsetting buy transaction is carried out at a lower (higher) price, inclusive of commissions.

Whether the Fund realizes a gain or loss from futures activities depends generally upon movements in the underlying currency, commodity, security or index. The extent of the Fund's loss from an unhedged short position in a futures contract is potentially unlimited and investors may lose the amount that they invest plus any profits recognized on that investment. The Fund will engage in transactions in futures contracts that are traded on a U.S. exchange or board of trade or that have been approved for sale in the U.S. by the CFTC.

Upon entering into a futures contract, the Fund will be required to deposit with the broker an amount of cash or cash equivalents in the range of approximately 1% to 3% of the contract amount for treasury futures (this amount is subject to change by the exchange on which the contract is traded). This amount, known as "initial margin," is in the nature of a performance bond or good

faith deposit on the contract and is returned to the Fund upon termination of the futures contract, assuming all contractual obligations have been satisfied. Subsequent payments, known as "variation margin," to and from the broker will be made daily as the price of the asset underlying the futures contract fluctuates, making the long and short positions in the futures contract more or less valuable, a process known as "marking-to-market." At any time prior to expiration of a futures contract, the Fund may elect to close its position by taking an opposite position, which will operate to terminate the Fund's existing position in the contract.

The primary risks associated with the use of futures contracts are imperfect correlation between movements in the price of futures and the market value of the underlying assets, and the possibility of an illiquid market for a futures contract. Although the Fund intends to sell futures contracts only if there is an active market for such contracts, no assurance can be given that a liquid market will exist for any particular contract at any particular time. Many futures exchanges and boards of trade limit the amount of fluctuation permitted in futures contract prices during a single trading day. Once the daily limit has been reached in a particular contract, no trades may be made that day at a price beyond that limit or trading may be suspended for specified periods during the day. Futures contract prices could move to the limit for several consecutive trading days with little or no trading, thereby preventing prompt liquidation of futures positions and potentially subjecting the Fund to substantial losses. If trading is not possible, or if the Fund determines not to close a futures position in anticipation of adverse price movements, the Fund will be required to make daily cash payments of variation margin. The risk that the Fund will be unable to close out a futures position will be minimized by entering into such transactions on a national exchange with an active and liquid secondary market. In addition, although the counterparty to a futures contract is often a clearing organization, backed by a group of financial institutions, there may be instances in which the counterparty could fail to perform its obligations, causing significant losses to the Fund.

Summary of Derivative Instruments

The following table summarizes the fair values of derivative instruments on the Fund's Statement of Assets and Liabilities, categorized by risk exposure, as of December 31, 2018.

	Assets		Liabilities	
	Unrealized Appreciation on Futures Contracts*	Unrealized Appreciation on Swap Agreements*	Unrealized Depreciation on Futures Contracts*	Unrealized Depreciation on Swap Agreements*
Access VP High Yield Fund				
Credit Risk Exposure	\$ —	\$ —	\$ —	\$666,700
Interest Rate Risk Exposure	3,741	—	—	—

* Includes cumulative appreciation/depreciation of futures contracts and cumulative unrealized gain (loss) on credit default swap agreements as reported in the Schedule of Portfolio Investments. Only current day's variation margin for both futures contracts and credit default swap agreements are reported within the Statement of Assets and Liabilities.

The following table presents the effect of derivative instruments on the Fund's Statement of Operations, categorized by risk exposure, for the year ended December 31, 2018.

	Realized Gain (Loss) on Derivatives Recognized as a Result from Operations		Change in Net Unrealized Appreciation/Depreciation on Derivatives Recognized as a Result from Operations	
	Net Realized Gains (Losses) on Futures Contracts	Net Realized Gains (Losses) on Swap Agreements	Change in Net Unrealized Appreciation/Depreciation on Futures Contracts	Change in Net Unrealized Appreciation/Depreciation on Swap Agreements
Access VP High Yield Fund				
Credit Risk Exposure	\$ —	\$1,011,881	\$ —	\$(844,742)
Interest Rate Risk	(99,835)	—	8,619	—

Investment Transactions and Related Income

Throughout the reporting period, investment transactions are accounted for no later than one business day following the trade date. For financial reporting purposes, investment transactions are accounted for on trade date on the last business day of the reporting period. Interest income is recognized on an accrual basis and includes, where applicable, the amortization of premium or accretion of discount. Dividend income is recorded on the ex-dividend date. Gains or losses realized on sales of securities are determined using the specific identification method by comparing the identified cost of the security lot sold with the net sales proceeds.

Allocations

Expenses directly attributable to the Fund are charged to the Fund, while expenses which are attributable to more than one fund in the Trust, or jointly with an affiliate, are allocated among the respective funds in the Trust and/or affiliate based upon relative net assets or another reasonable basis.

Distributions to Shareholders

The Fund intends to declare and distribute net investment income at least quarterly, if any. Net realized capital gains, if any, will be distributed annually.

The amount of distributions from net investment income and net realized gains are determined in accordance with federal income tax regulations which may differ from GAAP. These "book/tax" differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature (e.g., differing treatment on certain swap agreements, net operating loss, distribution reclassification, and equalization), such amounts are reclassified within the composition of net assets based on their federal tax-basis treatment; temporary differences (e.g., wash sales and differing treatment on certain swap agreements) do not require a reclassification. The Fund may utilize equalization accounting for tax purposes and designate earnings and profits, including net realized gains distributed to shareholders on redemption of shares, as a part of the dividends paid deduction for income tax purposes. Distributions which exceed net investment income and net realized capital gains for financial reporting purposes but not for tax purposes are reported as distributions in excess of net investment income or net realized gains. To the extent they exceed net investment income and net realized capital gains for tax purposes, they are reported as distribution of capital.

Federal Income Taxes

The Fund intends to continue to qualify each year as a regulated investment company (a "RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended. A RIC generally is not subject to federal income tax on income and gains distributed in a timely manner to its shareholders. The Fund intends to make timely distributions in order to avoid tax liability. Accordingly, no provision for federal income taxes is required in the financial statements. The Fund has a calendar tax year end.

Management of the Fund has reviewed tax positions taken in tax years that remain subject to examination by all major tax jurisdictions, including federal (i.e., the last four tax year ends and the interim tax period since then, as applicable). Management believes that there is no tax liability resulting from unrecognized tax benefits related to uncertain tax positions taken and the Fund is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

Other

Expense offsets to custody fees that arise from credits on cash balances maintained on deposit are reflected on the Statement of Operations, as applicable, as "Fees paid indirectly."

Expense Reimbursement from a Third Party

During 2018, the Fund received a reimbursement from a third party relating to expenses that were incurred in a prior year. This reimbursement is non-recurring and is disclosed on the Statement of Operations as "Expenses reimbursed by third parties". The corresponding impacts to the Fund's Total Return and Ratios to Average Net Assets in the Financial Highlights are disclosed in a footnote to the Financial Highlights.

Recent Accounting Pronouncements and Regulation S-X Amendments

In August 2018, the FASB issued ASU No. 2018-13, "Fair Value Measurements" ("ASU 2018-13"). This update makes certain removals from, changes to and additions to existing disclosure requirements for fair value measurements. ASU 2018-13 does not change fair value measurements already required or permitted by existing standards. ASU 2018-13 is effective for financial statements issued for fiscal years beginning after December 15, 2019, and interim periods within those fiscal years. As permitted, the Fund has early adopted ASU 2018-13 with the financial statements prepared as of December 31, 2018.

In August 2018, the SEC adopted amendments to certain financial statement disclosure requirements to conform them to GAAP for investment companies. These amendments made certain removals from, changes to and additions to existing disclosure requirements under Regulation S-X. The Fund's adoption of these amendments, effective with the financial statements prepared as of December 31, 2018 had no effect on the Fund's net assets or results of operations. As a result of adopting these amendments, the distributions to

shareholders in the December 31, 2017 Statements of Changes in Net Assets presented herein have been reclassified to conform to the current year presentation, which includes presenting all distributions to shareholders, other than tax basis return of capital distributions, if any, in one line-item, called "Total distributions". Prior to the adoption of this amendment, the distributions to shareholders in the December 31, 2017 Statements of Changes in Net Assets were presented as follows:

Fund:

Access VP High Yield Fund

<u>Distributions from:</u>	
<u>In excess of net investment income:</u>	<u>Net realized gains on investments:</u>
\$(1,689,114)	\$(1,730,928)

3. Investment Valuation Summary

The valuation techniques employed by the Fund, described below, maximize the use of observable inputs and minimize the use of unobservable inputs in determining fair value. These valuation techniques distinguish between market participant assumptions developed based on market data obtained from sources independent of the Fund (observable inputs) and the Fund's own assumptions about market participant assumptions developed based on the best information available under the circumstances (unobservable inputs). The inputs used for valuing the Fund's investments are summarized in the three broad levels listed below:

- **Level 1** – quoted prices in active markets for identical assets
- **Level 2** – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayments speeds, credit risk, etc.)
- **Level 3** – significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing investments are not necessarily an indication of the risk associated with investing in those investments. For example, repurchase agreements are generally valued at amortized cost. Generally, amortized cost approximates the current fair value of a security, but since the valuation is not obtained from a quoted price in an active market, such securities are reflected as Level 2. Fair value measurements may also require additional disclosure when the volume and level of activity for the asset or liability have significantly decreased, as well as when circumstances indicate that a transaction is not orderly. Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy.

Derivatives are generally valued using independent pricing services and/or agreements with counterparties or other procedures approved by the Trust's Board of Trustees. Futures contracts are generally valued at their last sale price prior to the time at which the net asset value per share of the Fund is determined and are typically categorized as Level 1 in the fair value hierarchy. Credit default swap agreements are generally valued according to prices as furnished by an independent pricing service, generally at the mean of the bid and ask quotes and are typically categorized as Level 2 in the fair value hierarchy. If there was no sale on that day, fair valuation procedures as described below may be applied.

Security prices are generally valued at their fair value using information provided by a third party pricing service or market

quotations or other procedures approved by the Trust's Board of Trustees. The securities in the portfolio of the Fund that are listed or traded on a stock exchange or the Nasdaq National Market System ("Nasdaq/NMS") are generally valued at the official closing price, if available, or the last sale price, on the exchange or system where the security is principally traded. If there have been no sales for that day on the exchange or system where the security is principally traded, then the value may be determined with reference to the last sale price, or the official closing price, if applicable, on any other exchange or system. In each of these situations, valuations are typically categorized as Level 1 in the fair value hierarchy. If there have been no sales for that day on any exchange or system, the security will be valued using fair value procedures in accordance with procedures approved by the Trust's Board of Trustees as described below.

Securities regularly traded in the over-the-counter ("OTC") markets, including securities listed on an exchange, but that are primarily traded OTC other than those traded on the Nasdaq/NMS, are generally valued on the basis of the mean between the bid and asked quotes furnished by dealers actively trading those instruments. Fixed-income securities are generally valued according to prices as furnished by an independent pricing service, generally at the mean of the bid and asked quotes for those instruments. Short-term fixed-income securities maturing in sixty days or less, and of sufficient credit quality, may be valued at amortized cost, which approximates fair value. Under the amortized cost method, premium or discount, if any, is amortized or accreted, respectively, on a constant basis to the maturity of the security. In each of these situations, valuations are typically categorized as Level 2 in the fair value hierarchy.

When the Advisor determines that the market price of a security is not readily available or deemed unreliable (e.g., an approved pricing service does not provide a price, a furnished price is in error, certain stale prices, or an event occurs that materially affects the furnished price), it may be valued by other methods that the Board of Trustees believes accurately reflects fair value. The use of such a fair valuation method may be appropriate if, for example: (i) market quotations do not accurately reflect fair value of an investment; (ii) an investment's value has been materially affected by events occurring after the close of the exchange or market on which the investment is principally traded; (iii) a trading halt closes an exchange or market early; or (iv) other events result in an exchange or market delaying its normal close. Any such fair

valuations will be conducted pursuant to Board-approved fair valuation procedures. Fair value pricing may require subjective determinations about the value of a security. While the Trust's policy is intended to result in a calculation of the Fund's NAV that fairly reflects security values as of the time of pricing, the Trust cannot ensure that fair values determined by the Advisor or persons acting at their direction would accurately reflect the price that the Fund could obtain for a security if it were to dispose of

that security as of the time of pricing (for instance, in a forced or distressed sale). The prices used by the Fund may differ from the value that would be realized if the securities were sold and the differences could be material to the financial statements. Depending on the source and relative significance of valuation inputs, these instruments may be classified as Level 2 or Level 3 in the fair value hierarchy.

For the year ended December 31, 2018, there were no Level 3 investments for which significant unobservable inputs were used to determine fair value.

A summary of the valuations as of December 31, 2018, based upon the three levels defined above, is included in the table below:

	LEVEL 1 - Quoted Prices		LEVEL 2 - Other Significant Observable Inputs		Total	
	Investment Securities	Other Financial Instruments [^]	Investment Securities	Other Financial Instruments [^]	Investment Securities	Other Financial Instruments [^]
Access VP High Yield Fund						
U.S. Treasury Obligation	\$ —	\$ —	\$ 8,345,066	\$ —	\$ 8,345,066	\$ —
Repurchase Agreements	—	—	5,076,000	—	5,076,000	—
Futures Contracts	—	3,741	—	—	—	3,741
Credit Default Swap Agreements	—	—	—	(666,700)	—	(666,700)
Total	\$ —	\$ 3,741	\$ 13,421,066	\$ (666,700)	\$ 13,421,066	\$ (662,959)

[^] Other financial instruments include any derivative instruments not reflected in the Schedule of Portfolio Investments as Investment Securities, such as futures contracts and credit default swap agreements. These instruments are generally recorded in the financial statements at the unrealized appreciation/(depreciation) on the investment.

4. Fees and Transactions with Affiliates and Other Parties

The Fund has entered into an Investment Advisory Agreement with the Advisor. Under this agreement, the Fund pays the Advisor a fee at an annualized rate of 0.75% of its average daily net assets.

In addition, subject to the condition that the aggregate daily net assets of the Trust and ProFunds, another investment company advised by the Advisor, be equal to or greater than \$10 billion, the Advisor has agreed to the following fee reductions with respect to each individual Fund: 0.025% of the Fund's daily net assets in excess of \$500 million to \$1 billion, 0.05% of the Fund's daily net assets in excess of \$1 billion to \$2 billion, and 0.075% of the Fund's daily net assets in excess of \$2 billion. During the year ended December 31, 2018, no Fund's annual investment advisory fee was subject to such reductions.

Citi Fund Services Ohio, Inc. ("Citi") acts as the Trust's administrator (the "Administrator"). For its services as Administrator, the Trust pays Citi an annual fee based on the Trust's and ProFunds' aggregate average net assets at a tier rate ranging from 0.00375% to 0.05%, and a base fee for certain filings. Administration fees also include additional fees paid to Citi by the Trust for additional services provided, including support of the Trust's compliance program.

Citi also acts as fund accounting agent for the Trust. For these services, the Trust pays Citi an annual fee based on the Trust's and ProFunds' aggregate average net assets at a tier rate ranging from 0.00375% to 0.03%, a base fee, and reimbursement of certain expenses.

FIS Investor Services LLC ("FIS") acts as transfer agent for the Trust. For these services, the Fund pays FIS a base fee, service charges,

fees based on the number of VP Funds, and reimbursement of certain expenses.

ProFunds Distributors, Inc. (the "Distributor"), a wholly owned subsidiary of the Advisor, serves as the Trust's distributor. Under a Distribution and Shareholder Services Plan, adopted by the Trust's Board of Trustees pursuant to Rule 12b-1 under the 1940 Act, the Fund may pay financial intermediaries such as broker-dealers, insurance companies and the Distributor up to 0.25%, on an annualized basis, of its average daily net assets as compensation for distribution-related activities and/or shareholder services.

The Advisor, pursuant to a separate Management Services Agreement, performs certain client support services and other administrative services on behalf of the Fund. For these services, the Fund pays the Advisor a fee at the annual rate of 0.10% of its average daily net assets.

The Trust, on behalf of the Fund, has entered into an administrative services agreement with certain insurance companies, pursuant to which the insurance companies will provide administrative services with respect to the Fund. For these services, the Fund may pay the insurance companies administrative services fees, a monthly / quarterly fee equal on an annual basis of up to 0.35% of its average daily net assets as reflected on the Statement of Operations as "Administrative services fees."

Certain Officers and a Trustee of the Trust are affiliated with the Advisor or the Administrator. Except as noted below with respect to the Trust's Chief Compliance Officer, such Officers and Trustee receive no compensation from the Fund for serving in their respective roles. The Trust, together with affiliated Trusts, pays each Independent Trustee compensation for his services at the annual rate of \$185,000.

Independent Trustees also receive \$10,000 for attending each regular quarterly in-person meeting, \$3,000 for attending each special meeting and \$3,000 for attending each telephonic meeting. During the year ended December 31, 2018, actual Trustee compensation was \$711,000 in aggregate from the Trust and affiliated trusts. There are certain employees of the Advisor, such as the Trust's Chief Compliance Officer and staff who administer the Trust's compliance program, in which the Fund reimburses the Advisor for their related compensation and certain other expenses incurred as reflected on the Statement of Operations as "Compliance services fees."

The Advisor has contractually agreed to waive advisory and management services fees, and if necessary, reimburse certain other expenses of the Fund in order to limit the annual operating expenses (exclusive of brokerage costs, interest, taxes, dividends (including dividend expenses on securities sold short), litigation,

indemnification, and extraordinary expenses as determined under GAAP) to an annualized rate of 1.68% of the average daily net assets of the Fund. This expense limitation remains in effect until at least April 30, 2019.

The Advisor may recoup the advisory and management services fees contractually waived or limited and other expenses reimbursed by it within three years of the end of the contractual period; however, such recoupment will be limited to the lesser of any expense limitation in place at the time of recoupment or the expense limitation in place at the time of waiver or reimbursement. Any amounts recouped by the Advisor during the year are reflected on the Statement of Operations as "Recoupment of prior expenses reduced by the Advisor." As of December 31, 2018, the Fund did not have any remaining amounts that could potentially be recouped by the Advisor.

5. Securities Transactions

The cost of U.S. government security purchases and the proceeds from the sale of U.S. government securities (excluding securities maturing less than one year from acquisition) during the year ended December 31, 2018 were as follows:

	Purchases	Sales
Access VP High Yield Fund	\$ 345,211,666	\$ 348,896,937

6. Investment Risks

The Fund may be subject to other risks in addition to these identified risks. This section discusses certain common principal risks encountered by the Fund.

Risks Associated with the Use of Derivatives

The Fund may obtain investment exposure through derivatives. Investing in derivatives may be considered aggressive, and may expose the Fund to greater risks and may result in larger losses or smaller gains than investing directly in the reference asset(s) underlying those derivatives. These risks include counterparty risk, liquidity risk and increased correlation risk. When the Fund uses derivatives, there may be imperfect correlation between the value of the reference asset(s) underlying the derivative (e.g., the securities in the high yield market) and the derivative, which may prevent the Fund from achieving its investment objective. Because derivatives often require only a limited initial investment, the use of derivatives also may expose the Fund to losses in excess of those amounts initially invested. Any costs associated with using derivatives will also have the effect of lowering the Fund's return.

Active Investor Risk

The Fund permits short-term trading of its securities. In addition, the Advisor expects a significant portion of the assets invested in the Fund to come from professional money managers and investors who use the Fund as part of active trading or tactical asset allocation strategies. These strategies often call for frequent trading to take advantage of anticipated changes in market conditions, which could increase portfolio turnover and may result in additional costs for the Fund. In addition, large movements of assets into and out of the Fund may have a negative impact on the Fund's ability to achieve its investment objective or maintain a consistent level of operating expenses. In certain circumstances,

the Fund's expense ratio may vary from current estimates or the historical ratio disclosed in the Fund's prospectus.

Credit Default Swaps (CDS) Risk

While the Fund will normally be a net "seller" of CDS, at times the Fund may be a net "buyer" of CDS. When the Fund is a seller of credit protection, upon the occurrence of a credit event, the Fund will have an obligation to pay the full notional value of a defaulted reference entity less recovery value. When the Fund is a buyer of credit protection, upon the occurrence of a credit event, the counterparty to the Fund will have an obligation to pay the full notional value of a defaulted reference entity less recovery value. Recovery values for CDS are generally determined via an auction process to determine the final price for a given reference entity. Although the Fund intends, as practicable, to obtain exposure through centrally cleared CDS, an active market may not exist for any of the CDS in which the Fund invests or in the reference entities subject to the CDS. As a result, the Fund's ability to maximize returns or minimize losses on such CDS may be impaired. Other risks of CDS include difficulty in valuation due to the lack of pricing transparency and the risk that changes in the value of the CDS do not reflect changes in the credit quality of the underlying reference entities or may otherwise perform differently than expected given market conditions. Because the Fund may use a single counterparty or a small number of counterparties, certain CDS involve many reference entities and there are no limitations on the notional amount established for the CDS. As a result, counterparty risk may be amplified.

Counterparty Risk

The Fund will invest in financial instruments involving third parties (i.e., counterparties). The use of financial instruments, such as CDS or futures contracts, involves risks that are different from those associated with ordinary portfolio securities transactions. The Fund will be subject to credit risk (i.e., the risk that a counterparty is unwilling or unable to make timely payments to

meet its contractual obligations) with respect to the amount it expects to receive from counterparties to financial instruments and repurchase agreements entered into by the Fund. The Fund generally structures the agreements such that, either party can terminate the contract without penalty prior to the termination date. The Fund may be negatively impacted if a counterparty becomes bankrupt or otherwise fails to perform its obligations, the value of an investment in the Fund may decline. The Fund may experience significant delays in obtaining any recovery in a bankruptcy or other reorganization proceeding and the Fund may obtain only limited recovery or may obtain no recovery in such circumstances.

The Fund typically enters into transactions with counterparties whose credit rating, at the time of the transaction, is investment grade, as determined by a nationally recognized statistical rating organization, or, if unrated, judged by the Advisor to be of comparable quality. These are usually major, global financial institutions. Although the counterparty to a centrally cleared swap agreement and/or exchange-traded futures contract is often backed by a futures commission merchant (“FCM”) or clearing organization that is further backed by a group of financial institutions, there may be instances in which the FCM or the clearing organization could fail to perform its obligations, causing significant losses to the Fund. For example, the Fund could lose margin payments it has deposited with a clearing organization as well as any gains owed but not paid to the Fund if the clearing organization becomes insolvent or otherwise fails to perform its obligations.

Under current CFTC regulations, a FCM maintains customers’ assets in a bulk segregated account. If a FCM fails to do so, or is unable to satisfy a substantial deficit in a customer account, its other customers may be subject to risk of loss of their funds in the event of that FCM’s bankruptcy. In that event, in the case of futures, the FCM’s customers are entitled to recover, even in respect of property specifically traceable to them, only a proportional share of all property available for distribution to all of that FCM’s customers. In the case of cleared swaps, customers of a FCM in bankruptcy are entitled to recover assets specifically attributable to them pursuant to new CFTC regulations, but may nevertheless risk loss of some or all of their assets due to accounting or operational issues or due to legal risk in connection with the application of bankruptcy law to cleared swaps.

Liquidity Risk

In certain circumstances, such as the disruption of the orderly markets for the securities or financial instruments in which the Fund invests, the Fund might not be able to acquire or dispose of certain holdings quickly or at prices that represent true fair value in the judgment of the Advisor. Markets for the securities or financial instruments in which the Fund invests may be disrupted by a number of events, including but not limited to economic crises, natural disasters, new legislation, or regulatory changes inside or outside of the U.S. For example, regulation limiting the ability of certain financial institutions to invest in certain securities would likely reduce the liquidity of those securities. These

situations may prevent the Fund from limiting losses, realizing gains, or from achieving a high correlation with the total return of the high yield market.

Debt Instruments Risk

The Fund will invest in, or seek exposure to, debt instruments. Debt instruments may have varying levels of sensitivity to changes in interest rates, issuer credit risk and other factors. Typically, the price of outstanding debt instruments falls when interest rates rise. Without taking into account other factors, the prices of debt instruments with longer maturities may fluctuate more in response to interest rate changes than those of debt instruments with shorter maturities. In addition, changes in the credit quality of the issuer of a debt instrument (including a default) can also affect the price of a debt instrument. These factors may cause the value of an investment in the Fund to change. All U.S. government securities are subject to credit risk. It is possible that the U.S. government may not be able to meet its financial obligations or that securities issued by the U.S. government may experience credit downgrades. Such a credit event may also adversely impact the financial markets.

High Yield Risk

Investment in or exposure to high yield (lower rated) debt instruments (also known as “junk bonds”) may involve greater levels of interest rate, credit, liquidity and valuation risk than for higher rated instruments. High yield debt instruments may be more sensitive to economic changes, political changes, or adverse developments specific to a company than other fixed income instruments. These securities are subject to greater risk of loss, greater sensitivity to economic changes, valuation difficulties, and a potential lack of a secondary or public market for securities. High yield debt instruments are considered predominantly speculative with respect to the issuer’s continuing ability to make principal and interest payments and, therefore, such instruments generally involve greater risk of default or price changes than higher rated debt instruments. An economic downturn or period of rising interest rates could adversely affect the market for these securities and reduce market liquidity (liquidity risk). Less active markets may diminish the Fund’s ability to obtain accurate market quotations when valuing the portfolio securities and thereby give rise to valuation risk. High yield debt instruments may also present risks based on payment expectations. For example, these instruments may contain redemption or call provisions. If an issuer exercises these provisions in a declining interest rate market, the Fund would have to replace the security with a lower yielding security, resulting in a decreased return for investors. If the issuer of a security is in default with respect to interest or principal payments, the issuer’s security could lose its entire value. Furthermore, the transaction costs associated with the purchase and sale of high yield debt instruments may vary greatly depending upon a number of factors and may adversely affect the Fund’s performance.

7. Federal Income Tax Information

The tax character of dividends paid to shareholders during the latest tax years ended, as noted below, were as follows:

	Year Ended December 31, 2018				Year Ended December 31, 2017			
	Distributions Paid from Ordinary Income	Distributions Paid from Net Long-Term Capital Gains	Tax Return of Capital	Total Distributions Paid	Distributions Paid from Ordinary Income	Distributions Paid from Net Long-Term Capital Gains	Tax Return of Capital	Total Distributions Paid
Access VP High Yield Fund	\$ 1,889,636	\$ 16,100	\$ 349,122	\$ 2,254,858	\$ 3,420,042	\$ —	\$ —	\$ 3,420,042

As of the latest tax year ended December 31, 2018, the components of accumulated earnings (deficit) on a tax basis were as follows:

	Undistributed Ordinary Income	Undistributed Long-Term Capital Gains	Accumulated Capital and Other Losses	Unrealized Appreciation (Depreciation)	Total Accumulated Earnings (Deficit)
Access VP High Yield Fund	\$ —	\$ —	\$ (1,904,595)	\$ 37,612	\$ (1,866,983)

As of the latest tax year ended December 31, 2018, the Fund had net capital loss carryforwards (“CLCFs”) as summarized in the table below. This CLCF is limited as a result of changes in Fund ownership during the year and in prior years.

	No Expiration Date
Access VP High Yield Fund	\$ 1,904,595

Unused limitations accumulate and increase limited CLCFs available for use in offsetting net capital gains. The Board does not intend to authorize a distribution of any realized gain for the Fund until any applicable CLCF has been offset or utilized.

At December 31, 2018, the cost, gross unrealized appreciation and gross unrealized depreciation on investment securities and derivative instruments, for federal income tax purposes, were as follows:

	Tax Cost	Tax Unrealized Appreciation	Tax Unrealized Depreciation	Net Unrealized Appreciation (Depreciation)
Access VP High Yield Fund	\$ 12,720,495	\$ 37,612	\$ —	\$ 37,612

8. Subsequent Events

The Fund has evaluated the need for additional disclosures or adjustments resulting from subsequent events through the date these financial statements were issued. Based on this evaluation, there were no subsequent events to report that have a material impact on the Fund’s financial statements.

To the Board of Trustees of Access One Trust and Shareholders of Access VP High Yield Fund

Opinion on the Financial Statements

We have audited the accompanying statement of assets and liabilities, including the schedule of portfolio investments, of Access VP High Yield Fund (one of the funds constituting Access One Trust, referred to hereafter as the "Fund") as of December 31, 2018, the related statement of operations for the year ended December 31, 2018, the statement of changes in net assets for each of the two years in the period ended December 31, 2018, including the related notes, and the financial highlights for each of the five years in the period ended December 31, 2018 (collectively referred to as the "financial statements"). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Fund as of December 31, 2018, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period ended December 31, 2018 and the financial highlights for each of the five years in the period ended December 31, 2018 in conformity with accounting principles generally accepted in the United States of America.

Basis for Opinion

These financial statements are the responsibility of the Fund's management. Our responsibility is to express an opinion on the Fund's financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Fund in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. Our procedures included confirmation of securities owned as of December 31, 2018 by correspondence with the custodian and brokers. We believe that our audits provide a reasonable basis for our opinion.

PricewaterhouseCoopers LLP
Baltimore, Maryland
February 25, 2019

We have served as the auditor of one or more investment companies in ProFunds, Access One Trust and ProShares Trust group since 1997.

For the fiscal year ended December 31, 2018, the amount of long-term capital gain designated by the Fund was as follows:

	<u>Long-Term Capital Gain</u>
Access VP High Yield Fund	\$ 16,100

For the fiscal year ended December 31, 2018, the amount of short-term capital gain designated by the Fund was as follows:

	<u>Short-Term Capital Gain</u>
Access VP High Yield Fund	\$ 1,116,381

At a meeting held on September 27 – 28, 2018, the Board of Trustees (the “Board”), including the trustees who are not “interested persons” of the Trust as defined in the 1940 Act (the “Independent Trustees”), unanimously approved the renewal of the Investment Advisory Agreement between ProFund Advisors LLC (the “Advisor”) and the Trust on behalf of each of its operational series (each, a “Fund” and collectively, the “Funds”) (the “Advisory Agreement”).

The Board, including all of the Independent Trustees, determined that the terms of the Advisory Agreement for each Fund were fair and reasonable and in the best interests of such Fund and its shareholders.

The Board requested, and the Advisor provided, information that the Board and the Advisor, respectively, believed to be reasonably necessary to evaluate the Advisory Agreement, including:

- (i) information about the advisory services that were being provided by the Advisor;
- (ii) the Advisor’s Form ADV;
- (iii) biographies of the employees of the Advisor who are primarily responsible for providing investment advisory services to the various Funds;
- (iv) information regarding each component of the contractual fee rates and actual fee rates for the prior fiscal year;
- (iv) information regarding advisory fees earned versus advisory fees waived for previous periods;
- (v) performance information for prior periods;
- (vi) comparative industry fee data;
- (vii) information about fees and other amounts that were received by the Advisor and its affiliates for non-advisory services;
- (ix) information regarding the Advisor’s trade allocation and best execution policies and procedures;
- (x) information about the financial condition of the Advisor; and
- (xi) information regarding how the Advisor monitors each Fund’s compliance with regulatory requirements and Trust procedures.

The Board evaluated this information and was advised by legal counsel to the Funds, and the Independent Trustees were advised by independent legal counsel with respect to their deliberations. In addition, the Trustees retained the services of an independent consultant to assist them in evaluating information with respect to certain aspects of their review of the contractual arrangements with respect to the Funds. In its deliberations, the Board did not identify any single factor as all-important or controlling and individual Trustees did not necessarily attribute the same weight or importance to each factor. The Board evaluated all information available to it on a Fund-by-Fund basis, and their determinations were made separately with respect to each Fund.

In addition to the information provided and discussions that occurred at the meeting on September 27-28, 2018, the Board regularly considers matters bearing on the Funds and their investment advisory, administration and distribution arrangements, including the Funds’ investment results and performance data, at its regular meetings throughout the year. The Board’s conclusions with respect to the renewal of the Advisory Agreement with respect to a Fund may take into account their

consideration of the relevant arrangements during the course of the year and in prior years.

The Board took note of the information that was provided and considered the factors they deemed relevant, including, among other things:

- (i) the nature, extent and quality of the services that were provided to each Fund by the Advisor;
- (ii) the costs of the services provided and the profits realized by the Advisor from its relationship with the Funds;
- (iii) the investment performance of the Funds; and
- (iv) the extent to which economies of scale might be realized as the Funds grow and whether fee levels reflect economies of scale, if any, for the benefit of Fund shareholders.

Nature, Extent and Quality of the Advisor’s Services

The Board reviewed the nature, extent and quality of the investment advisory services performed by the Advisor. The Board focused on the quality of the personnel and operations at the Advisor and the systems and processes required to manage the Funds effectively. In particular, the Board considered the following:

- the investment objective of each Fund, the Advisor’s description of the skills needed to manage each Fund and the Advisor’s success in achieving the investment objectives of each Fund;
- the size and experience of the Advisor’s portfolio staff and the Advisor’s ability to recruit, train and retain personnel with relevant experience and the specific expertise necessary to manage the Funds;
- the structure of the portfolio staff compensation program and the incentives it is intended to provide;
- the collateral, credit and cash management functions at the Advisor and the enhancements made in these areas;
- the Advisor’s development of investment strategies, including those involving the use of complex financial instruments and processes that maximize the Funds’ ability to meet their stated investment objectives and minimize counterparty risk;
- significant investment in personnel and state-of-the-art technology that the Advisor has made over the course of several years; and
- information regarding allocation of Fund brokerage and the selection of counterparties for Fund portfolio transactions, as well as favorable terms of derivatives transactions the Advisor was able to negotiate with swap counterparties on behalf of various Funds.

The Board also reviewed the Advisor’s compliance program, including specific activities associated with the Funds. The Board discussed the compliance program with the Funds’ Chief Compliance Officer (CCO). The Board and the CCO discussed the CCO’s evaluation of the operation of the Advisor’s compliance program, and efforts with respect to the Funds, changes made to the Advisor’s compliance program since the CCO’s last annual report to the Board, and whether the CCO believed additional enhancements to the compliance program were warranted. The Board discussed compliance issues reported to the Board during the reporting period and the remediation of such issues. The Board

discussed key risk areas identified by the CCO and how such risks are addressed by the compliance program.

Based upon its review, the Board concluded that, with respect to each Fund, (i) the investment advisory services provided by the Advisor were of high quality, (ii) the Advisor successfully achieved the investment goals of the Funds, (iii) the Advisor's services benefited the Funds' shareholders, particularly in light of the nature of the Funds and the services required to support them, and (iv) they were generally satisfied with the nature, quality and extent of services provided to the Funds by the Advisor.

Comparison of Advisory Services and Fees

The Board considered the fairness and reasonableness of the investment advisory fees payable to the Advisor in light of the investment advisory services provided, the costs of these services and the comparability to the fees paid by other investment companies, including mutual funds offering strategies similar in nature and extent to the Funds. The Board discussed the methodology used to prepare the comparative fee data for each Fund and the potential limitation of such data. Notwithstanding this challenge, the Board found the comparative information it received to be useful in its evaluation of the reasonableness of the Advisor's fee. The Advisor presented information about the significant drivers of cost and also examined the costs to investors to achieve the objectives of the Funds on their own, and took note that it would be more expensive or impractical to do so.

The Board reviewed information prepared by the consultant, comparing management fee and expense information for each Fund to that of a peer group determined by the consultant. The Board reviewed peer group information prepared by the consultant comparing the contractual advisory fee rate to be paid by the Funds to other funds with investment objectives most similar to the Funds. The Board also considered the fee waiver and/or expense reimbursement arrangements currently in place for each Fund and considered the net advisory fees paid by the Funds after taking waivers and reimbursements into account.

The Board considered and discussed the fees charged and the services provided by the Advisor as sub-advisor. The Board recognized that it is difficult to make comparisons of advisory fees because there are variations in the services that are included in the fees paid by other funds but concluded that the Funds' advisory fee rates were reasonable given the services provided.

Profitability

The Board considered the significant drivers of cost incurred by the Advisor in managing the Funds, including, but not limited to, intellectual capital, regulatory compliance, portfolio rebalancing, and entrepreneurial risk, and considered the costs that investors likely would incur if they independently sought to achieve the objectives of the Funds. The Board considered the profitability to the Advisor of its management of each of the Funds.

The Board recognized that it is difficult to compare the Advisor's profitability to that of other managers because comparative information is in most cases not publicly available and to the extent such information is available it is affected by numerous factors, including the nature of a fund's shareholder base, the structure of the particular advisor, the types of funds it manages, its business

mix, numerous assumptions regarding allocations and the fact that publicly-traded fund managers' operating profits and net income are typically reported net of distribution and marketing expenses. The Independent Trustees met in executive session to discuss and evaluate the information provided by the Advisor and the independent consultant. Among other things, the Trustees reviewed information regarding the financial condition and profitability of the Advisor, including the methodologies involved in calculating profitability.

Based on its review, the Board concluded that the profitability to the Advisor of the Advisory Agreement was reasonable in light of the services and benefits provided to each Fund.

Investment Performance of the Funds and the Advisor

The Board considered total return information for each Fund and focused on the correlation of returns to benchmark information for each Fund for the 3-month, 1-year, 5-year, 10-year and since inception periods ended June 30, 2018. The Board also considered performance information provided at regular Board meetings throughout the reporting period. The Board noted that correlation of returns for each Fund remained strong during the applicable periods and Fund performance was generally within expected ranges. The Board further noted that the correlation of the Funds' performance with the performance of a benchmark was a more meaningful factor than the Fund's total return.

The Board also considered the Advisor's non-advisory services, including those performed under a separate Management Services Agreement. The Independent Trustees also considered any indirect, or "fall-out," benefits that the Advisor or its affiliates derived from their relationship to the Funds but concluded that such benefits were relatively insignificant. The Board considered that ProFund Distributors, Inc., a wholly-owned subsidiary of the Advisor, earns fees from the Funds for providing services under a Distribution and Shareholder Services Plan.

Economies of Scale

The Board discussed with representatives of the Advisor potential economies of scale associated with certain costs, and how and when shareholders might benefit from economies of scale. The Board considered that effective January 1, 2008, subject to the condition that the aggregate daily net assets of the Trust and the ProFunds trust be equal to or greater than \$10 billion, the Advisor has agreed to reduce each Fund's annual investment advisory fee by 0.025% on assets in excess of \$500 million up to \$1 billion, 0.05% on assets in excess of \$1 billion up to \$2 billion and 0.075% on assets in excess of \$2 billion.

Conclusions

The Board, including all of the Independent Trustees, concluded that, with respect to each Fund, the investment advisory fees and any other compensation payable to the Advisor were reasonable in relation to the nature and the quality of the services provided and that the continuation of the Advisory Agreement was in the best interests of the shareholders of the Fund. The Board indicated to the Advisor that it will continue to consider and evaluate on an ongoing basis potential economies of scale and how Fund shareholders might benefit from those economies of scale.
