ProFunds.com

Many ProFunds seek daily investment results that correspond, before fees and expenses, to a multiple (e.g., 2x, -2x) of the daily performance of its underlying benchmark (the "Daily Target"). While these Funds have a daily investment objective, you may hold Fund shares for longer than one day if you believe it is consistent with your goals and risk tolerance. For any holding period other than a day, your return may be higher or lower than the Daily Target. These differences may be significant. Smaller index gains/losses and higher index volatility contribute to returns worse than the Daily Target. Larger index gains/losses and lower index volatility contribute to returns better than the Daily Target. The more extreme these factors are, the more they occur together, and the longer your holding period while these factors apply, the more your return will tend to deviate. Investors should consider periodically monitoring their geared fund investments in light of their goals and risk tolerance.

Investing involves risk, including the possible loss of principal. ProFunds mutual funds are generally non-diversified and each entails certain risks, which may include risk associated with the use of derivatives (swap agreements, futures contracts and similar instruments), imperfect benchmark correlation, leverage and market price variance, all of which can increase volatility and decrease performance. **There is no guarantee any ProFunds mutual fund will achieve its investment objective. ProFunds are not suitable for all investors because of the sophisticated techniques the funds employ.**

Carefully consider the investment objectives, risks, charges and expenses of ProFunds before investing. This and other information can be found in their summary and full prospectuses. Read them carefully before investing. Obtain them from your financial advisor or by visiting ProFunds.com. ProFunds are distributed by ProFunds Distributors, Inc.
