

## PROFUNDS

### Bitcoin Strategy ProFund (BTCFX) (the “Fund”)

#### Supplement dated March 15, 2022 to the Fund’s Summary Prospectus, Statutory Prospectus and Statement of Additional Information dated November 30, 2021, each as supplemented or amended

James Linneman no longer serves as portfolio manager of the Fund and has been replaced by George Banian. The following changes to the Fund’s summary prospectus, statutory prospectus and statement of additional information are effective immediately:

#### Summary Prospectus and Statutory Prospectus

*The “Management” section in the Fund’s summary section is deleted in its entirety and replaced with the following:*

The Fund is advised by ProFund Advisors. Alexander Ilyasov, Senior Portfolio Manager, and George Banian, Portfolio Manager, have jointly and primarily managed the Fund since July 2021 and March 2022, respectively.

*The paragraph containing James Linneman’s biography in the “Portfolio Management” section of the Statutory Prospectus is deleted in its entirety and replaced with the following:*

George Banian, ProShare Advisors: Portfolio Manager since February 2022, Associate Portfolio Manager from August 2016 to February 2022, Senior Portfolio Analyst from December 2010 to August 2016, Portfolio Analyst from December 2007 to December 2010. ProFund Advisors: Portfolio Manager since February 2022, Associate Portfolio Manager from July 2021 to February 2022.

#### Statement of Additional Information

Information about James Linneman in the “Portfolio Manager Ownership” and “Other Accounts Managed by Portfolio Managers” tables in the “PORTFOLIO MANAGEMENT” section of the SAI is deleted in its entirety and replaced with the following, respectively:

<b>Name of Portfolio Manager</b>	<b>Dollar Range of Equity Securities in the Fund Managed by the Portfolio Manager</b>	<b>Aggregate Dollar Range of Equity Securities in All Registered Investment Companies in the Fund Complex</b>
George Banian	None	None

<b>Name of Portfolio Manager</b>	<b>Number of All Registered Investment Companies Managed/Total Assets</b>	<b>Number of All Other Pooled Investment Vehicles Managed/Total Assets</b>	<b>Number of All Other Accounts Managed/Total Assets</b>
George Banian	0/\$0	0/\$0	0/\$0

## Summary Prospectus

NOVEMBER 30, 2021

### Bitcoin Strategy ProFund

CLASS	TICKER	CUSIP
Investor	BTCFX	74318X653

As permitted by regulations adopted by the Securities and Exchange Commission, paper copies of the Fund's annual and semi-annual shareholder reports will no longer be sent by mail, unless you specifically request paper copies of the reports. Instead, the reports will be made available on the Fund's website ([www.profund.com](http://www.profund.com)), and you will be notified by mail each time a report is posted and provided with a website link to access the report.

If you already elected to receive shareholder reports electronically, you will not be affected by this change and you need not take any action. You may elect to receive shareholder reports and other communications from the Fund electronically anytime by contacting your financial intermediary (such as a broker-dealer or bank) or, if you are a direct investor, by calling 888-PRO-FNDS (888-776-3637) or by sending an e-mail request to [info@profund.com](mailto:info@profund.com).

You may elect to receive all future reports in paper free of charge. If you invest through a financial intermediary, you can contact your financial intermediary to request that you continue to receive paper copies of your shareholder reports. If you invest directly with the Fund, you can call 888-PRO-FNDS (888-776-3637) or send an email request to [info@profund.com](mailto:info@profund.com) to let the Fund know you wish to continue receiving paper copies of your shareholder reports. Your election to receive reports in paper will apply to all funds held in your account if you invest through your financial intermediary or all funds held with the fund complex if you invest directly with the Fund.

This Summary Prospectus is designed to provide investors with key fund information in a clear and concise format. Before you invest, you may want to review the Fund's Full Prospectus, which contains more information about the Fund and its risks. The Fund's Full Prospectus, dated November 30, 2021, and Statement of Additional Information, dated November 30, 2021, and as each hereafter may be supplemented or amended, are incorporated by reference into this Summary Prospectus. All of this information may be obtained at no cost either: online at [ProFunds.com/ProFundsinfo](http://ProFunds.com/ProFundsinfo); by calling 888-PRO-3637 (888-776-3637) (financial professionals should call 888-PRO-5717 (888-776-5717)); or by sending an e-mail request to [info@ProFunds.com](mailto:info@ProFunds.com). The Securities and Exchange Commission has not approved or disapproved these securities or passed upon the adequacy of this Summary Prospectus. Any representation to the contrary is a criminal offense.

## Investment Objective

The Bitcoin Strategy ProFund (the “Fund”) seeks capital appreciation. There can be no assurance that the Fund will achieve its investment objective.

## Fees and Expenses of the Fund

The table below describes the fees and expenses that you may pay if you buy, hold, and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.

### Shareholder Fees

(fees paid directly from your investment)

#### Wire Fee \$10

#### Annual Fund Operating Expenses

(expenses that you pay each year as a percentage of the value of your investment)

Investment Advisory Fees	0.45%
Other Expenses <sup>1</sup>	1.01%

#### Total Annual Fund Operating Expenses Before Fee

1.46%

Fee Waivers/Reimbursements<sup>2</sup> -0.31%

#### Total Annual Fund Operating Expenses After Fee

1.15%

1 “Other Expenses” are estimated. Other Expenses includes 0.31% of Interest Expense incurred in the course of implementing the Fund’s strategy.

2 ProFund Advisors LLC (“ProFund Advisors”) has contractually agreed to waive Investment Advisory Fees and to waive or reimburse Other Expenses, excluding Interest Expense, to the extent necessary to limit such fees and expenses to 0.84% through November 30, 2022. After such date, the expense limitation may be terminated or revised by ProFund Advisors. Amounts waived or reimbursed in a particular contractual period may be recouped by ProFund Advisors within three years of the end of that contractual period, however, such recoupment will be limited to the lesser of any expense limitation in place at the time of recoupment or the expense limitation in place at the time of waiver or reimbursement.

**Example:** This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem or hold all of your shares at the end of each period. The example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same, except that the fee waiver/expense reimbursement is assumed only to pertain to the first year. Although your actual costs may be higher or lower, based on these assumptions your approximate costs would be:

	1 Year	3 Years	5 Years	10 Years
Investor Class	\$117	\$431	\$768	\$1,720

The Fund pays transaction and financing costs associated with the purchase and sale of securities and derivatives. These costs are not reflected in the table or the example above.

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when the Fund’s shares are held in a taxable account. These costs, which are not reflected in the Annual Fund Operating Expenses or in the example above, affect the Fund’s performance. From the date of the Fund’s inception through July 31, 2021, the Fund’s annual portfolio turnover rate was 0% of the average value of its entire portfolio.

## Principal Investment Strategies

The Fund seeks to provide capital appreciation by investing all or substantially all of its assets through managed exposure to bitcoin futures contracts. **The Fund does not invest directly in bitcoin.**

Bitcoin is a digital asset, sometimes referred to as a digital currency or “cryptocurrency.” The ownership and operation of bitcoin is determined by participants in an online, peer-to-peer network sometimes referred to as the “Bitcoin Network”. The Bitcoin Network connects computers that run publicly accessible, or “open source,” software that follows the rules and procedures governing the Bitcoin Network. This is commonly referred to as the Bitcoin Protocol (and is described in more detail in the section entitled “The Bitcoin Protocol” in the Fund’s Prospectus). The value of bitcoin is not backed by any government, corporation, or other identified body. Instead, its value is determined in part by the supply and demand in markets created to facilitate trading of bitcoin. Ownership and transaction records for bitcoin are protected through public-key cryptography. The supply of bitcoin is determined by the Bitcoin Protocol. No single entity owns or operates the Bitcoin Network. The Bitcoin Network is collectively maintained by (1) a decentralized group of participants who run computer software that results in the recording and validation of transactions (commonly referred to as “miners”), (2) developers who propose improvements to the Bitcoin Protocol and the software that enforces the protocol and (3) users who choose which version of the bitcoin software to run. From time to time, the developers suggest changes to the bitcoin software. If a sufficient number of users and miners elect not to adopt the changes, a new digital asset, operating on the earlier version of the bitcoin software, may be created. This is often referred to as a “fork.” The price of the bitcoin futures contracts in which the Fund invests may reflect the impact of these forks.

While the Fund seeks to invest primarily in bitcoin futures contracts, the Fund also may invest in other instruments as described below.

- **Bitcoin Futures Contracts** – Standardized, cash-settled bitcoin futures contracts traded on commodity exchanges

registered with the Commodity Futures Trading Commission (“CFTC”). Currently, the only such contracts are traded on, or subject to the rules of, the Chicago Mercantile Exchange (“CME”). The final settlement value of bitcoin futures is determined by reference to the CME CF Bitcoin Reference Rate, which is designed to provide an indication of the price of bitcoin across certain cash bitcoin exchanges. The Fund seeks to invest in cash settled, front-month bitcoin futures, but may also obtain exposure to bitcoin futures contracts by investing in back month, cash-settled bitcoin futures contracts. Front-month bitcoin futures contracts are those contracts with the shortest time to maturity. Back-month bitcoin futures contracts are those with longer times to maturity. As of the date of this Prospectus, the Fund has reached the position limits applicable to front-month bitcoin futures contracts and is obtaining a portion of its exposure to bitcoin futures by investing in back-month bitcoin futures contracts. The Fund expects to gain exposure by investing a portion of its assets in a wholly-owned subsidiary of the Fund organized under the laws of the Cayman Islands and advised by ProFund Advisors. The Fund generally expects to invest approximately 25% of its total assets in this subsidiary. The Fund may, however, exceed this amount from time to time if the Advisor believes doing so is in the best interest of the Fund, such as to help the Fund achieve its investment objective or manage the tax efficiency of the Fund. Exceeding this amount may have tax consequences, see the section entitled “Tax Risk” in the Fund’s Prospectus for more information. References to investments by the Fund should be read to mean investments by either the Fund or the subsidiary.

- **Canadian Exchange Traded Funds** – In limited circumstances, for example to manage inflows and outflows or respond to unusual market conditions or increased margin requirements, the Fund may invest in the securities of exchange traded funds, or “ETFs”, organized and listed for trading in Canada. The shares of these ETFs represent an interest in a portfolio of bitcoin.
- **Money Market Instruments** — The Fund invests in short-term cash instruments that have a remaining maturity of 397 days or less and exhibit high quality credit profiles, for example:
  - **U.S. Treasury Bills** — U.S. government securities that have initial maturities of one year or less, and are supported by the full faith and credit of the U.S. government.
  - **Repurchase Agreements** — Contracts in which a seller of securities, usually U.S. government securities or other money market instruments, agrees to buy the securities back at a specified time and price. Repurchase agreements are primarily used by the Fund as a short-term investment vehicle for cash positions.
- **Borrowing** – The Fund seeks to engage in reverse repurchase agreements and use the proceeds for investment purposes.

The Fund does not take temporary defensive positions. The Fund will generally hold its bitcoin futures contracts during periods in which the value of bitcoin is flat or declining as well as during periods in which the value of bitcoin is rising. In order to maintain its exposure to bitcoin futures contracts, the Fund must sell its futures contracts as they near expiration and replace them with new futures contracts with a later expiration date. This is often referred to as “rolling” a futures contract. Futures contracts with a longer term to expiration may be priced higher than futures contracts with a shorter term to expiration, a relationship called “contango.” When rolling futures contracts that are in contango, the Fund will sell the expiring contract at a relatively lower price and buy a longer-dated contract at a relatively higher price.

Conversely, futures contracts with a longer term to expiration may be priced lower than futures contracts with a shorter term to expiration, a relationship called “backwardation.” When rolling futures contracts that are in backwardation, the Fund will sell the expiring contract at a relatively higher price and buy a longer-dated contract at a relatively lower price.

The Fund is classified as non-diversified, which means it has the ability to invest a relatively high percentage of its assets in financial instruments with a single counterparty or a few counterparties. The Fund does not invest in, or seek direct exposure to, the current “spot” or cash price of bitcoin.

**Investors seeking direct exposure to the price of bitcoin should consider an investment other than the Fund.**

Please see “Investment Objectives, Principal Investment Strategies and Related Risks” in the Fund’s Prospectus for additional details.

### **Principal Risks**

The principal risks described below are intended to provide information about the factors likely to have a significant adverse impact on the Fund’s returns and consequently the value of an investment in the Fund. The risks are presented in an order intended to facilitate readability and their order does not imply that the realization of one risk is more likely to occur than another risk or likely to have a greater adverse impact than another risk.

**Bitcoin and bitcoin futures are relatively new investments. They are subject to unique and substantial risks, and historically, have been subject to significant price volatility. The value of an investment in the Fund could decline significantly and without warning, including to zero. You should be prepared to lose your entire investment. The performance of bitcoin futures contracts and therefore the performance of the Fund may differ significantly from the performance of bitcoin.**

- **Investment Strategy Risk** – The Fund invests in bitcoin futures contracts and other instruments that provide exposure to bitcoin futures. The Fund does not invest directly in or hold bitcoin. The price of bitcoin futures should be expected to differ from the current cash price of bitcoin, which is

sometimes referred to as the “spot” price of bitcoin. Consequently, the performance of the Fund should be expected to perform differently from the spot price of bitcoin. These differences could be significant.

- **Market and Volatility Risk** – The prices of bitcoin and bitcoin futures have historically been highly volatile. The value of the Fund’s investments in bitcoin futures and other instruments that provide exposure to bitcoin futures – and therefore the value of an investment in the Fund – could decline significantly and without warning, including to zero. If you are not prepared to accept significant and unexpected changes in the value of the Fund and the possibility that you could lose your entire investment in the Fund you should not invest in the Fund.
- **Liquidity Risk** — The market for the bitcoin futures contracts is still developing and may be subject to periods of illiquidity. During such times it may be difficult or impossible to buy or sell a position at the desired price. Market disruptions or volatility can also make it difficult to find a counterparty willing to transact at a reasonable price and sufficient size. Illiquid markets may cause losses, which could be significant. The large size of the positions which the Fund may acquire increases the risk of illiquidity, may make its positions more difficult to liquidate, and may increase the losses incurred while trying to do so. Such large positions also may impact the price of bitcoin futures, which could decrease the correlation between the performance of bitcoin futures and the “spot” price of bitcoin.
- **Bitcoin Futures Risk** – The market for bitcoin futures may be less developed, and potentially less liquid and more volatile, than more established futures markets. While the bitcoin futures market has grown substantially since bitcoin futures commenced trading, there can be no assurance that this growth will continue. The price for bitcoin futures contracts is based on a number of factors, including the supply of and the demand for bitcoin futures contracts. Market conditions and expectations, position limits, collateral requirements, and other factors each can impact the supply of and demand for bitcoin futures contracts. Recently increased demand paired with supply constraints and other factors have caused bitcoin futures to trade at a significant premium to the “spot” price of bitcoin. Additional demand, including demand resulting from the purchase, or anticipated purchase, of bitcoin futures contracts by the Fund or other entities may increase that premium, perhaps significantly. It is not possible to predict whether or for how long such conditions will continue. To the extent the Fund purchases futures contracts at a premium and the premium declines, the value of an investment in the Fund also should be expected to decline.

Market conditions and expectations, position limits, collateral requirements, and other factors may also limit the Fund’s ability to achieve its desired exposure to bitcoin futures contracts. If the Fund is unable to achieve such exposure it may not be able to meet its investment objective and the

Fund’s returns may be different or lower than expected. Additionally, collateral requirements may require the Fund to liquidate its position, potentially incurring losses and expenses, when it otherwise would not do so. Investing in derivatives like bitcoin futures may be considered aggressive and may expose the Fund to significant risks. These risks include counterparty risk and liquidity risk.

The performance of bitcoin futures contracts and bitcoin may differ and may not be correlated with each other, over short or long periods of time. The performance of back-month futures contracts are likely to differ more significantly from the spot price of bitcoin. To the extent the Fund is invested in back-month bitcoin future contracts, the performance of the Fund should be expected to deviate more significantly from the performance of the spot price of bitcoin.

- **Bitcoin Futures Capacity Risk** – If the Fund’s ability to obtain exposure to bitcoin futures contracts consistent with its investment objective is disrupted for any reason including, for example, limited liquidity in the bitcoin futures market, a disruption to the bitcoin futures market, as a result of margin requirements or position limits imposed by the Fund’s futures commission merchants (“FCMs”), the CME, or the CFTC, or if some or all of the Fund’s FCMs exit the business, the Fund may not be able to achieve its investment objective and may experience significant losses. Any disruption in the Fund’s ability to obtain exposure to bitcoin futures contracts will cause the Fund’s performance to deviate from the performance of bitcoin and bitcoin futures. Additionally, the ability of the Fund to obtain exposure to bitcoin futures contracts is limited by certain tax rules that limit the amount the Fund can invest in its wholly-owned subsidiary as of the end of each tax quarter. Exceeding this amount may have tax consequences, see the section entitled “Tax Risk” in the Fund’s Prospectus for more information.
- **Cost of Futures Investment Risk** – As discussed above, when a bitcoin futures contract is nearing expiration, the Fund will “roll” the futures contract, which means it will generally sell such contract and use the proceeds to buy a bitcoin futures contract with a later expiration date. When rolling futures contracts that are in contango, the Fund would sell a lower priced, expiring contract and purchase a higher priced, longer-dated contract. The price difference between the expiring contract and longer-dated contract associated with rolling bitcoin futures is typically substantially higher than the price difference associated with rolling other futures contracts. Bitcoin futures have historically experienced extended periods of contango. Contango in the bitcoin futures market may have a significant adverse impact on the performance of the Fund and may cause bitcoin futures to underperform spot bitcoin. Both contango and backwardation may limit or prevent the Fund from achieving its investment objective. The impact of both contango and backwardation may also be greater to the extent the Fund invests in back-month futures contracts.

- **Bitcoin Risk** – Bitcoin is a relatively new innovation and the market for bitcoin is subject to rapid price swings, changes and uncertainty. The further development of the Bitcoin Network and the acceptance and use of bitcoin are subject to a variety of factors that are difficult to evaluate. The slowing, stopping or reversing of the development of the Bitcoin Network or the acceptance of bitcoin may adversely affect the price of bitcoin. Bitcoin is subject to the risk of fraud, theft, manipulation or security failures, operational or other problems that impact bitcoin trading venues. Additionally, if one or a coordinated group of miners were to gain control of 51% of the Bitcoin Network, they would have the ability to manipulate transactions, halt payments and fraudulently obtain bitcoin. A significant portion of bitcoin is held by a small number of holders sometimes referred to as “whales”. These holders have the ability to manipulate the price of bitcoin. Unlike the exchanges for more traditional assets, such as equity securities and futures contracts, bitcoin and bitcoin trading venues are largely unregulated. As a result of the lack of regulation, individuals or groups may engage in fraud or market manipulation (including using social media to promote bitcoin in a way that artificially increases the price of bitcoin). Investors may be more exposed to the risk of theft, fraud and market manipulation than when investing in more traditional asset classes. Over the past several years, a number of bitcoin trading venues have been closed due to fraud, failure or security breaches. Investors in bitcoin may have little or no recourse should such theft, fraud or manipulation occur and could suffer significant losses. Legal or regulatory changes may negatively impact the operation of the Bitcoin Network or restrict the use of bitcoin. The realization of any of these risks could result in a decline in the acceptance of bitcoin and consequently a reduction in the value of bitcoin, bitcoin futures, and the Fund. Finally, the creation of a “fork” (as described above) or a substantial giveaway of bitcoin (sometimes referred to as an “air drop”) may result in significant and unexpected declines in the value of bitcoin, bitcoin futures, and the Fund.
- **Canadian ETF Risk** – Canadian ETFs that provide exposure to bitcoin are subject to many of the same risks as a direct investment in bitcoin. Additionally, shares of these ETFs may trade at a premium or discount from the value of their underlying investments, may become illiquid, may or may not be correlated with the price of bitcoin or bitcoin futures contracts, and may be highly volatile. If the Fund invests in an ETF, the Fund’s shareholders will indirectly bear the Fund’s proportionate share of the fees and expenses paid by that ETF, in addition to the Fund’s own fees and expenses. In addition, Canadian ETFs are not regulated under the 1940 Act, the Securities Act of 1933, as amended, or any other U.S. federal or state securities laws. Therefore, the Fund’s investments in these vehicles will not benefit from the protections and restrictions of such laws.
- **Cash and Money Market Instruments Risk** – Cash held by the Fund may be adversely affected by negative returns on cash holdings. Money market instruments may be adversely affected by market and economic events affecting issuers of money market instruments. Defaults by transaction counterparties may also have a negative impact on the performance of such instruments. Each of these could have a negative impact on the performance of the Fund.
- **Subsidiary Investment Risk** — Changes in the laws of the United States and/or the Cayman Islands, under which the Fund and the subsidiary are organized, respectively, could result in the inability of the Fund to operate as intended and could negatively affect the Fund and its shareholders.
- **Borrowing Risk** – The Fund may borrow for investment purposes using reverse repurchase agreements. The cost of borrowing may reduce the Fund’s return. Borrowing may cause a Fund to liquidate positions under adverse market conditions to satisfy its repayment obligations. Borrowing increases the risk of loss and may increase the volatility of the Fund.
- **Counterparty Risk** — Investing in derivatives and repurchase agreements involves entering into contracts with third parties (i.e., counterparties). The use of derivatives and repurchase agreements involves risks that are different from those associated with ordinary portfolio securities transactions. The Fund will be subject to credit risk (i.e., the risk that a counterparty is or is perceived to be unwilling or unable to make timely payments or otherwise meet its contractual obligations) with respect to the amount it expects to receive from counterparties to derivatives and repurchase agreements entered into by the Fund. If a counterparty becomes bankrupt or fails to perform its obligations, or if any collateral posted by the counterparty for the benefit of the Fund is insufficient or there are delays in the Fund’s ability to access such collateral, the value of an investment in the Fund may decline.

The counterparty to a listed futures contract is the derivatives clearing organization for the listed future. The listed future is held through an FCM acting on behalf of the Fund. Consequently, the counterparty risk on a listed futures contract is the creditworthiness of the FCM and the exchange’s clearing corporation.
- **Non-Diversification Risk** — The Fund is classified as “non-diversified” under the Investment Company Act of 1940, as amended (“1940 Act”). This means it has the ability to invest a relatively high percentage of its assets in the securities of a small number of issuers or in financial instruments with a single counterparty or a few counterparties. This may increase the Fund’s volatility and increase the risk that the Fund’s performance will decline based on the performance of a single issuer or the credit of a single counterparty.
- **Active Management Risk** — The Fund is actively managed and its performance reflects the investment decisions that ProFund Advisors makes for the Fund. ProFund Advisors’ judgements about the Fund’s investments may prove to be incorrect. If the investments selected and strategies employed

by the Fund fail to produce the intended results, the Fund could underperform or have negative returns as compared to other funds with a similar investment objective and/or strategies.

- **Active Investor Risk** —The Fund permits short-term trading of its securities. A significant portion of assets invested in the Fund may come from professional money managers and investors who use the Fund as part of active trading or tactical asset allocation strategies. These strategies often call for frequent trading to take advantage of anticipated changes in market conditions, which could increase portfolio turnover and may result in additional costs for the Fund. In addition, large movements of assets into and out of the Fund may have a negative impact on the Fund's ability to achieve its investment objective or maintain a consistent level of operating expenses. In certain circumstances, the Fund's expense ratio may vary from current estimates or the historical ratio disclosed in this Prospectus.
- **Early Close/Late Close/Trading Halt Risk** — An exchange or market may close early, close late or issue trading halts on specific securities or financial instruments. As a result, the ability to trade certain securities or financial instruments may be restricted, which may result in the Fund being unable to trade those and other related financial instruments at all. In these circumstances, the Fund may be unable to rebalance its portfolio, may be unable to accurately price its investments and/or may incur substantial trading losses.
- **Portfolio Turnover Risk** — The Fund may incur high portfolio turnover to manage the Fund's investment exposure. Additionally, active trading of the Fund's shares may cause more frequent purchase and sales activities that could, in certain circumstances, increase the number of portfolio transactions. High levels of portfolio transactions increase brokerage and other transaction costs and may result in increased taxable capital gains. Each of these factors could have a negative impact on the performance of the Fund.
- **Tax Risk** — In order to qualify for the special tax treatment accorded a regulated investment company ("RIC") and its shareholders, the Fund must derive at least 90% of its gross income for each taxable year from "qualifying income," meet certain asset diversification tests at the end of each taxable quarter, and meet annual distribution requirements. The Fund's pursuit of its investment strategies will potentially be limited by the Fund's intention to qualify for such treatment and could adversely affect the Fund's ability to so qualify. The Fund can make certain investments, the treatment of which for these purposes is unclear. If, in any year, the Fund were to fail to qualify for the special tax treatment accorded a RIC and its shareholders, and were ineligible to or were not to cure such failure, the Fund would be taxed in the same manner as an ordinary corporation subject to U.S. federal income tax on all its income at the fund level. The resulting taxes could

substantially reduce the Fund's net assets and the amount of income available for distribution. In addition, in order to requalify for taxation as a RIC, the Fund could be required to recognize unrealized gains, pay substantial taxes and interest, and make certain distributions. Please see the section entitled "Tax Risk" in the Statement of Additional Information for more information.

- **Valuation Risk** — In certain circumstances (e.g., if ProFund Advisors believes market quotations do not accurately reflect the fair value of an investment, or a trading halt closes an exchange or market early), ProFund Advisors may, pursuant to procedures established by the Board of Trustees of the Fund, choose to determine a fair value price as the basis for determining the market value of such investment for such day. The fair value of an investment determined by ProFund Advisors may be different from other value determinations of the same investment. Portfolio investments that are valued using techniques other than market quotations, including "fair valued" investments, may be subject to greater fluctuation in their value from one day to the next than would be the case if market quotations were used. In addition, there is no assurance that the Fund could sell a portfolio investment for the value established for it at any time, and it is possible that the Fund would incur a loss because a portfolio investment is sold at a discount to its established value. The fair value of the Fund's bitcoin futures may be determined by reference, in whole or in part, to the cash market in bitcoin. These circumstances may be more likely to occur with respect to bitcoin futures than with respect to futures on more traditional assets.

Please see "Investment Objective, Principal Investment Strategies and Related Risks" in the Fund's Prospectus for additional details.

## Investment Results

Performance history will be available for the Fund after it has been in operation for a full calendar year. After the Fund has a full calendar year of performance information, performance information will be shown on an annual basis.

## Management

The Fund is advised by ProFund Advisors. Alexander Ilyasov, Senior Portfolio Manager, and James Linneman, Portfolio Manager, have jointly and primarily managed the Fund since July 2021.

## Purchase and Sale of Fund Shares

The **minimum initial investment** amounts, which may be waived at the discretion of the Fund, are:

- \$1,000 for accounts that list a financial professional.
- \$1,000 for self-directed accounts.

You may purchase, redeem or exchange Fund shares on any day which the New York Stock Exchange is open for business.

Depending on where your account is held, you may redeem your shares by contacting your financial professional or the Fund by mail, telephone, wire transfer or on-line ([www.profund.com](http://www.profund.com)).

### **Tax Information**

The Fund's distributions generally are taxable, and will be taxed as ordinary income, qualified dividend income or capital gains, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. You may be taxed later upon withdrawal of monies from such tax-advantaged arrangements. The Fund intends to distribute income, if any, quarterly, and capital gains, if any, at least annually.

### **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase Fund shares through a financial intermediary, such as a broker-dealer or investment adviser, the Fund and its distributor may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other financial intermediary to recommend the Fund over another investment. Ask your financial intermediary or visit your financial intermediary's website for more information.
