Message from the Chairman

Dear Shareholder:

As the economy and our local communities continue to recover from the impacts of COVID-19, we would like to reaffirm our commitment to providing our clients with the products and services that help them meet their investment goals and objectives. I am pleased to present the semiannual report to shareholders of the Government Money Market ProFund for the six months ended June 30, 2021.

The Government Money Market ProFund invests substantially all of its assets in the Government Cash Management Portfolio, a separate investment company managed by DWS Investment Management Americas, Inc.

Money market rates moved in a range of 0.05% to 0.1% during the period, closely tracking the effective Federal Funds rate, which ended the period at 0.1%.

The Economy Continued to Emerge from the Pandemic

The U.S. economy grew at a robust pace during the reporting period as a result of strong corporate earnings, Congress's \$1.9 trillion coronavirus stimulus package, the lifting of restrictions on most businesses, and significant progress on administering vaccines. First-quarter real GDP grew by 6.4%, annualized. Unemployment declined during the period, according to the U.S. Bureau of Labor Statistics, closing June at 5.9% as the economy added 850,000 new jobs.

Inflation rose above the Fed's annual target of 2% during the reporting period, but Fed officials and other economists

commented that the sharp rate of inflation is likely attributable to prices climbing back from pandemic lows and short-term supply shortages. The Fed remained committed to its accommodative policies of monthly bond purchases until the economy fully recovers, even though other countries have begun to taper their bond purchases.

Government Money Market ProFund

During this period characterized by low interest rates, the Government Money Market ProFund continued to achieve its objective of maintaining a stable net asset value of \$1.00 per share for investors. The fund potentially benefits investors by seeking a high level of current income consistent with liquidity and capital preservation. It also serves investors as a vehicle for moving money between ProFunds products, or holding assets until they are ready to invest.

We thank you for the trust and confidence you have placed in us by using the Government Money Market ProFund and appreciate the opportunity to continue serving your investing needs.

Sincerely,

Michael L. Sapir
Chairman of the Board of Trustees

Allocation of Portfolio Holdings and Expense Examples

Investment Objective: The Government Money Market ProFund seeks a high level of current income consistent with liquidity and preservation of capital.

An investment in this ProFund is neither guaranteed nor insured by the Federal Deposit Insurance Corporation or any other government agency. Although the ProFund strives to maintain the value of your investment at \$1.00 per share, it is possible to lose money by investing in the ProFund.

Allocation of Portfolio Holdings

Government Money Market ProFund Market Exposure		Government Cash Management Portfolio Asset Allocation ^(a)	
Investment Type	% of Net Assets	Investment Type	% of Net Assets
Investment in Government Cash Management Portfolio ^(a)	94%	Government & Agency Obligations	
		U.S. Government Sponsored Agencies	14%
		U.S. Treasury Obligations	47%
		Repurchase Agreements	40%
Total Exposure	94%		

^(a) The Government Cash Management Portfolio holdings are included in the accompanying financial statements of the ProFund.

Expense Examples

As a ProFund shareholder, you may incur two types of costs: (1) transaction costs, including wire redemption fees; and (2) ongoing costs, including management fees; distribution and service (12b-1) fees; and other ProFund expenses (including expenses allocated from the Government Cash Management Portfolio). These examples are intended to help you understand your ongoing costs (in dollars) of investing in the ProFund and to compare these costs with the ongoing cost of investing in other mutual funds. Please note that the expenses shown in the table below are meant to highlight your ongoing costs only and do not reflect any transactional costs. If these transactional costs were included, your costs would have been higher. Therefore, these examples are useful in comparing ongoing costs only and will not help you determine the relative total cost of owning different funds.

Actual Expenses

The actual expense examples are based on an investment of \$1,000 invested at the beginning of a six-month period and held throughout the entire period ended June 30, 2021.

The columns below under the heading entitled “Actual” provide information about actual account values and actual expenses. You may use this information, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the table under the heading entitled “Actual Expenses Paid During Period” to estimate the expenses you paid on your account during this period.

Hypothetical Expenses for Comparison Purposes

The hypothetical expense examples are based on an investment of \$1,000 invested at the beginning of a six-month period and held throughout the entire period ended June 30, 2021.

The columns below under the heading entitled “Hypothetical” provide information about hypothetical account values and hypothetical expenses based on the ProFund’s actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the ProFund’s actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the ProFund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

	Annualized Expense Ratio During Period	Beginning Account Value 1/1/21	Actual		Hypothetical (5% return before expense)	
			Ending Account Value 6/30/21	Expenses Paid During Period*	Ending Account Value 6/30/21	Expenses Paid During Period*
Government Money Market ProFund – Investor Class	0.04%	\$1,000.00	\$1,000.10	\$0.20	\$1,024.60	\$0.20
Government Money Market ProFund – Service Class	0.04%	1,000.00	1,000.10	0.20	1,024.60	0.20

* Expenses are equal to the average account value over the period multiplied by the ProFund’s annualized expense ratio multiplied by 181/365 (the number of days in the most recent fiscal half-year divided by the number of days in the fiscal year).

Financial Statements and Financial Highlights

Statement of Assets and Liabilities (unaudited)
June 30, 2021

ASSETS:

Investment in Government Cash Management Portfolio, at value	\$ 198,567,908
Receivable for capital shares issued	21,494,357
Receivable from Advisor under a yield support agreement	65,906

^(a) Per share net investment income has been calculated using the average daily shares method.

^(b) Per share amounts and percentages include the applicable allocation from the Government Cash Management Portfolio.

^(c) Not annualized for periods less than one year.

^(d) Annualized for periods less than one year.

^(e) For the periods ended June 30, 2021, December 31, 2020, December 31, 2019, December 31, 2018, December 31, 2017, and December 31, 2016, the Advisor to the Government Cash Management Portfolio waived fees which were allocated to the Government Money Market ProFund on a pro-rata basis. If included, the corresponding impact to the gross expense ratio would be an increase of 0.06%, 0.06%, 0.07%, 0.04%, 0.03%, and 0.05%, respectively.

^(f) Amount is less than \$0.0005.

^(g) The expense ratio for the period reflects the deduction of certain expenses to maintain a certain minimum net yield.

See accompanying notes to the financial statements.

Notes to Financial Statements

1. Organization

ProFunds (the “Trust”) consists of 115 separate investment portfolios and is registered as an open-end management investment company under the Investment Company Act of 1940 (the “1940 Act”) and thus follows accounting and reporting guidance for investment companies. On December 10, 2020, the Trust’s Board of Trustees approved an agreement and plan of reorganization and termination pursuant to which Access One Trust would reorganize into a corresponding newly created series within ProFunds (an affiliated trust). That transaction occurred on April 26, 2021. The Trust is organized as a Delaware statutory trust and is authorized to issue an unlimited number of shares of beneficial interest of no par value which may be issued in more than one class or series. The accompanying financial statements relate to the Government Money Market ProFund, (the “ProFund”). The ProFund has two classes of shares: the Investor Class and Service Class. The ProFund is a feeder fund in a master-feeder fund structure and seeks to achieve its objective by investing all of its investable assets in the Government Cash Management Portfolio (the “Portfolio”), an open-end management investment company that is advised by DWS Investment Management Americas, Inc. (“DIMA”) and has the same investment objective as the ProFund. As of June 30, 2021, the percentage of the Portfolio’s interests owned by the ProFund was 0.7%. The financial statements of the Portfolio, including its schedule of portfolio investments, are included in this report and should be read in conjunction with the ProFund’s financial statements.

Each class of shares has identical rights and privileges except with respect to fees paid under the Distribution and Shareholder Services Plan and voting rights on matters affecting a single class of shares.

Under the Trust’s organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Trust. In addition, in the normal course of business, the Trust enters into contracts with its vendors and others that provide for general indemnifications. The Trust and ProFund’s maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the ProFund.

2. Significant Accounting Policies

The following is a summary of significant accounting policies followed by the ProFund in preparation of its financial statements. These policies are in conformity with U.S. generally accepted accounting principles (“GAAP”). The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. The actual results could differ from those estimates.

Investment Valuation

The ProFund records its investments in the Portfolio at fair value, which represents its proportionate ownership of the value of the Portfolio’s net assets. The valuation techniques used to determine fair value are further described in Note 3. The Portfolio’s Notes to Financial Statements included elsewhere in this report provide

information about the Portfolio’s valuation policy and its period-end security valuations.

Investment Transactions and Related Income

The ProFund records daily its proportionate share of the Portfolio’s income, expenses, and realized gains and losses. In addition, the ProFund accrues its own expenses.

Allocations

Expenses directly attributable to the ProFund are charged to the ProFund, while expenses which are attributable to more than one fund in the Trust, or jointly with an affiliate, are allocated among the respective funds in the Trust and/or affiliate based upon relative net assets or another reasonable basis.

The investment income, expenses (other than class specific expenses charged to a class) and realized gains and losses on investments of the ProFund are allocated to each class of shares based upon relative net assets on the date income is earned or expenses and realized gains and losses are incurred.

Distributions to Shareholders

The ProFund declares distributions from net investment income daily and pays the dividends on a monthly basis. Net realized capital gains, if any, will be distributed annually.

The amount of distributions from net investment income and net realized gains are determined in accordance with federal income tax regulations which may differ from GAAP. These “book/tax” differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature (e.g., return of capital, distribution reclassification), such amounts are reclassified within the composition of net assets based on their federal tax-basis treatment; temporary differences do not require reclassification.

Federal Income Taxes

The ProFund intends to continue to qualify each year as a regulated investment company (a “RIC”) under Subchapter M of the Internal Revenue Code of 1986, as amended. A RIC generally is not subject to federal income tax on income and gains distributed in a timely manner to its shareholders. The ProFund intends to make timely distributions in order to avoid tax liability. Accordingly, no provision for federal income taxes is required in the financial statements. The ProFund has a calendar tax year end.

Management of the ProFund has reviewed tax positions taken in tax years that remain subject to examination by all major tax jurisdictions, including federal (i.e., the last four tax year ends and the interim tax period since then, as applicable). Management believes that there is no tax liability resulting from unrecognized tax benefits related to uncertain tax positions taken and the ProFund is not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

3. Investment Valuation Summary

The valuation techniques employed by the ProFund, described below, maximize the use of observable inputs and minimize the use of unobservable inputs in determining fair value. The inputs

used for valuing the ProFund's investments are summarized in the three broad levels listed below:

- **Level 1** – quoted prices in active markets for identical assets
- **Level 2** – other significant observable inputs (including quoted prices for similar securities, interest rates, prepayments speeds, credit risk, etc.)
- **Level 3** – significant unobservable inputs (including the ProFund's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing investments are not necessarily an indication of the risk associated with investing in those investments. Changes in valuation techniques may result in transfers in or out of an assigned level within the disclosure hierarchy.

As of June 30, 2021, the ProFund's \$198,567,908 investment in the Portfolio, which is a registered investment company, is based on Level 2 inputs due to the ProFund's master-feeder structure. There were no Level 1 or Level 3 investments held by the ProFund during the period ended June 30, 2021.

4. Fees and Transactions with Affiliates and Other Parties

ProFund Advisors LLC (the "Advisor") serves as the investment advisor of the ProFund for an annual fee equal to 0.35% of the average daily net assets of the ProFund, although no fee is payable under the agreement unless the master-feeder relationship with the Portfolio is terminated and the Advisor directly invests the assets of the ProFund. DIMA is the investment advisor to the Portfolio in which the ProFund invests its assets.

Citi Fund Services Ohio, Inc. ("Citi") acts as the Trust's administrator (the "Administrator"). For its services as Administrator, the Trust pays Citi an annual fee based on the Trust's aggregate average net assets at an annualized tier rate ranging from 0.00375% to 0.05%, and a base fee for certain filings. Administration fees include additional fees paid to Citi by the Trust for additional services provided, including support of the Trust's compliance program.

FIS Investor Services LLC ("FIS") acts as the Trust's transfer agent. For these services, the Trust pays FIS a base fee, account and service charges, and reimbursement of certain expenses.

ProFunds Distributors, Inc. (the "Distributor"), a wholly owned subsidiary of the Advisor, serves as the Trust's distributor. Under a Distribution and Shareholder Services Plan, adopted by the Trust's Board of Trustees pursuant to Rule 12b-1 under the 1940 Act, the

The Advisor has contractually agreed to waive management services fees, and if necessary, reimburse certain other expenses of the ProFund for the periods below in order to limit the annual operating expenses (exclusive of brokerage costs, interest, taxes, litigation, indemnification, and extraordinary expenses) as follows:

	For the Period May 1, 2021 through April 30, 2022		For the Period May 1, 2020 through April 30, 2021	
	Investor Class	Service Class	Investor Class	Service Class
Government Money Market ProFund	0.98%	1.98%	0.98%	1.98%

The Advisor has also contractually agreed to waive management services fees, and if necessary, reimburse certain other expenses of the ProFund through April 30, 2022 to the extent necessary to maintain a certain minimum net yield as determined by the Advisor. The Advisor has contractually undertaken to waive its fees and/or reimburse certain expenses to maintain the minimum yield floor limit at 0.02% through April 30, 2022.

ProFund may pay financial intermediaries such as broker-dealers, investment advisors and the Distributor up to 1.00%, on an annualized basis, of the average daily net assets attributable to Service Class shares as compensation for service and distribution-related activities and/or shareholder services with respect to Service Class shares.

The Distribution and Service Fees were suspended effective January 1, 2021 throughout the remainder of the period ended June 30, 2021. If the ProFund had paid an amount equal to 1.00% of the average daily net assets attributable to Service Class shares for the entire period, the Distribution and Service Fees would have been \$46,726 for the period ended June 30, 2021. All or a portion of the Distribution and Services Fees may be reinstated at any time.

The Advisor, pursuant to a separate Management Services Agreement, performs certain client support services and other administrative services on behalf of the ProFund. For these services, the ProFund pays the Advisor a fee at the annual rate of 0.35% of its average daily net assets for providing feeder fund management and administrative services to the ProFund.

The Advisor, pursuant to a separate Services Agreement, performs certain services related to the operation and maintenance of a shareholder trading platform. For these services, the Trust pays the Advisor a monthly base fee as reflected on the Statement of Operations as "Service fees".

The ProFund pays fees to certain intermediaries or financial institutions for record keeping, sub-accounting services, transfer agency and other administrative services as reflected on the Statement of Operations as "Administrative services fees".

Certain Officers and a Trustee of the Trust are affiliated with the Advisor or the Administrator. Except as noted below with respect to the Trust's Chief Compliance Officer, such Officers and Trustee receive no compensation from the ProFund for serving in their respective roles. The Trust, together with affiliated Trusts, pays each Independent Trustee compensation for his services at the annual rate of \$185,000. Independent Trustees also receive \$10,000 for attending each regular quarterly in-person meeting, \$3,000 for attending each special in-person meeting and \$3,000 for attending each telephonic meeting. During the period ended June 30, 2021, actual Trustee compensation was \$346,500 in aggregate from the Trust and affiliated trusts. There are certain employees of the Advisor, such as the Trust's Chief Compliance Officer and staff who administer the Trust's compliance program, in which the ProFund reimburses the Advisor for their related compensation and certain other expenses incurred as reflected on the Statement of Operations as "Compliance services fees".

The Advisor may recoup the management services fees contractually waived or limited and other expenses reimbursed by it within three years from the expense limit period and minimum yield limit period in which they were taken. Such recoupment shall be made monthly, but only to the extent that such recoupment would not cause the net yield of each Class of the ProFund to fall below the highest previously determined minimum yield and such recoupment would not cause annualized operating expenses to exceed the expense limit in effect at the time of the waiver, and the expense limit in effect at the time of the recoupment. Any amounts recouped by the Advisor during the period are reflected on the Statement of Operations as "Recoupment of prior expenses reduced by the Advisor". As of June 30, 2021, the recoupments that may potentially be made by the ProFund are as follows:

	Expires 4/30/23	Expires 4/30/24	Expires 4/30/25	Total
Government Money Market ProFund	\$ 204,782	\$ 1,742,170	\$ 287,298	\$ 2,234,250

5. Investment Risks

The Fund may be subject to other risks in addition to these identified risks. This section discusses certain common principal risks encountered by the Fund. The risks are presented in an order intended to facilitate readability, and their order does not imply that the realization of one risk is likely to occur more frequently than another risk, nor does it imply that the realization of one risk is likely to have a greater adverse impact than another risk.

Natural Disaster/Epidemic Risk

Natural or environmental disasters, such as earthquakes, fires, floods, hurricanes, tsunamis and other severe weather-related phenomena generally, and widespread disease, including pandemics and epidemics (for example, the novel coronavirus (COVID-19)), have been and can be highly disruptive to economies and markets and have recently led, and may continue to lead, to increased market volatility and significant market losses. Such as natural disaster and health crises could exacerbate political, social, and economic risks previously mentioned, and result in significant breakdowns, delays, shutdowns, social isolation, and other disruptions to important global, local and regional supply chains affected, with potential corresponding results on the operating performance of the Fund and its investments. A climate of uncertainty and panic, including the contagion of infectious viruses or diseases, may adversely affect global, regional, and local economies and reduce the availability of potential investment opportunities, and increases the difficulty of performing due diligence and modeling market conditions, potentially reducing the accuracy of financial projections. Under these circumstances, the Fund may have difficulty achieving its investment objective which may adversely impact performance. Further, such events can be highly disruptive to economies and markets, significantly disrupt the operations of individual companies (including, but not limited to, the Fund's investment advisor and third party service

providers), sectors, industries, markets, securities and commodity exchanges, currencies, interest and inflation rates, credit ratings, investor sentiment, and other factors affecting the value of the Fund's investments. These factors can cause substantial market volatility, exchange trading suspensions and closures and can impact the ability of the Fund to complete redemptions and otherwise affect Fund performance and Fund trading in the secondary market. A widespread crisis may also affect the global economy in ways that cannot necessarily be foreseen at the current time. How long such events will last and whether they will continue or recur cannot be predicted. Impacts from these events could have significant impact on the Fund's performance, resulting in losses to your investment.

Risk that Current Assumptions and Expectations Could Become Outdated As a Result of Global Economic Shocks

The onset of the novel coronavirus (COVID-19) has caused significant shocks to global financial markets and economies, with many governments taking extreme actions to slow and contain the spread of COVID-19. These actions have had, and likely will continue to have, a severe economic impact on global economies as economic activity in some instances has essentially ceased. Financial markets across the globe are experiencing severe distress at least equal to what was experienced during the global financial crisis in 2008. In March 2020, U.S. equity markets entered a bear market in the fastest such move in the history of U.S. financial markets. Contemporaneous with the onset of the COVID-19 pandemic in the US, oil experienced shocks to supply and demand, impacting the price and volatility of oil. The global economic shocks being experienced as of the date hereof may cause the underlying assumptions and expectations of the Fund to become outdated quickly or inaccurate, resulting in significant losses.

6. Federal Income Tax Information

The tax character of dividends paid to shareholders during the applicable tax years ended, as noted below, were as follows:

	Ordinary Income	Total Distributions Paid
December 31, 2020 Government Money Market ProFund	\$ 352,353	\$ 352,353
December 31, 2019 Government Money Market ProFund	\$ 4,333,453	\$ 4,333,453

As of the most recent tax year ended December 31, 2020, the components of accumulated earnings (deficit) on a tax basis were as follows:

	<u>Undistributed Ordinary Income</u>	<u>Undistributed Long-Term Capital Gains</u>	<u>Distributions Payable</u>	<u>Accumulated Capital and Other Losses</u>	<u>Total Unrealized Appreciation (Depreciation)</u>	<u>Accumulated Earnings (Deficit)</u>
Government Money Market ProFund	\$ —	\$ —	\$ (1,350)	\$ (3,514)	\$ —	\$ (4,864)

As of the tax year ended December 31, 2020, the ProFund had net capital loss carryforwards (“CLCFs”) as summarized in the table below:

	<u>No Expiration Date</u>
Government Money Market ProFund	\$ 3,514

Unused limitations accumulate and increase limited CLCFs available for use in offsetting net capital gains. The Board does not intend to authorize a distribution of any realized gain for the ProFund until any applicable CLCF has been offset or utilized.

7. Subsequent Events

On July 28, 2021, the Bitcoin Strategy ProFund commenced operations, increasing the number of separate investment portfolios in the Trust to 116. The ProFund has evaluated the need for additional disclosures or adjustments resulting from subsequent events through the date these financial statements were issued. Based on this evaluation, there were no additional subsequent events to report that have a material impact on the ProFund’s financial statements.

Fair Value Measurements

Various inputs are used in determining the value of the Portfolio's investments. These inputs are summarized in three broad levels. Level 1 includes quoted prices in active markets for identical securities. Level 2 includes other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds and credit risk). Level 3 includes significant unobservable inputs (including the Portfolio's own assumptions in determining the fair value of investments). The level assigned to the securities valuations may not be an indication of the risk or liquidity associated with investing in those securities. Securities held by the Portfolio are reflected as Level 2 because the securities are valued at amortized cost (which approximates fair value) and, accordingly, the inputs used to determine value are not quoted prices in an active market.

The following is a summary of the inputs used as of June 30, 2021 in valuing the Portfolio's investments. For information on the Portfolio's policy regarding the valuation of investments, please refer to the Security Valuation section of Note A in the accompanying Notes to Financial Statements.

Assets	Level 1	Level 2	Level 3	Total
Investments in Securities ^(a)	\$ —	\$17,490,750,589	\$ —	\$17,490,750,589
Repurchase Agreements	\$ —	\$11,516,000,000	\$ —	\$11,516,000,000
Total	\$ —	\$29,006,750,589	\$ —	\$29,006,750,589

(a) See Investment Portfolio for additional detailed categorizations.

A. Organization and Significant Accounting Policies

Government Cash Management Portfolio (the “Portfolio”) is registered under the Investment Company Act of 1940, as amended (the “1940 Act”), as an open-end management investment company organized as a New York trust.

The Portfolio is a master fund; A master/feeder fund structure is one in which a fund (a “feeder fund”), instead of investing directly in a portfolio of securities, invests most or all of its investment assets in a separate registered investment company (the “master fund”) with substantially the same investment objective and policies as the feeder fund. Such a structure permits the pooling of assets of two or more feeder funds, preserving separate identities or distribution channels at the feeder fund level. The Portfolio may have several feeder funds, including affiliated DWS feeder funds and unaffiliated feeder funds, with a significant ownership percentage of the Portfolio’s net assets. Investment activities of these feeder funds could have a material impact on the Portfolio. As of June 30, 2021, DWS Government Cash Management Fund and DWS Government Money Market Series owned approximately 1% and 98%, respectively, of the Portfolio.

The Portfolio’s financial statements are prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) which require the use of management estimates. Actual results could differ from those estimates. The Portfolio qualifies as an investment company under Topic 946 of Accounting Standards Codification of U.S. GAAP. The policies described below are followed consistently by the Portfolio in the preparation of its financial statements.

Security Valuation

Various inputs are used in determining the value of the Portfolio’s investments. These inputs are summarized in three broad levels. Level 1 includes quoted prices in active markets for identical securities. Level 2 includes other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds and credit risk). Level 3 includes significant unobservable inputs (including the Portfolio’s own assumptions in determining the fair value of investments). The level assigned to the securities valuations may not be an indication of the risk or liquidity associated with investing in those securities.

The Portfolio values all securities utilizing the amortized cost method permitted in accordance with Rule 2a-7 under the 1940 Act and certain conditions therein. Under this method, which does not take into account unrealized capital gains or losses on securities, an instrument is initially valued at its cost and thereafter assumes a constant accretion/amortization rate to maturity of any discount or premium. Securities held by the Portfolio are reflected as Level 2 because the securities are valued at amortized cost (which approximates fair value) and, accordingly, the inputs used to determine value are not quoted prices in an active market.

Repurchase Agreements

The Portfolio may enter into repurchase agreements, under the terms of a Master Repurchase Agreement, with certain banks and broker/dealers whereby the Portfolio, through its custodian or a sub-custodian bank, receives delivery of the underlying securities, the amount of which at the time of purchase and each subsequent business day is required to be maintained at such a level that the value is equal to at least the principal amount of the repurchase price plus accrued interest. The custodian bank or another designated sub-custodian bank holds the collateral in a separate account until the agreement matures. If the value of the securities falls below the principal amount of the repurchase agreement plus accrued interest, the financial institution deposits additional collateral by the following business day. If the financial institution either fails to deposit the required additional collateral or fails to repurchase the securities as agreed, the Portfolio has the right to sell the securities and recover any resulting loss from the financial institution. If the financial institution enters into bankruptcy, the Portfolio’s claims on the collateral may be subject to legal proceedings.

As of June 30, 2021, the Portfolio held repurchase agreements with a gross value of \$11,516,000,000. The value of the related collateral exceeded the value of the repurchase agreements at period end. The detail of the related collateral is included in the footnotes following the Portfolio’s Investment Portfolio.

Federal Income Taxes

The Portfolio is considered a Partnership under the Internal Revenue Code, as amended. Therefore, no federal income tax provision is necessary.

It is intended that the Portfolio’s assets, income and distributions will be managed in such a way that an investor in the Portfolio will be able to satisfy the requirements of Subchapter M of the Code, assuming that the investor invested all of its assets in the Portfolio.

At June 30, 2021, Government Cash Management Portfolio had an aggregate cost of investments for federal income tax purposes of \$29,006,750,589.

The Portfolio has reviewed the tax positions for the open tax years as of December 31, 2020 and has determined that no provision for income tax and/or uncertain tax positions is required in the Portfolio’s financial statements. The Portfolio’s federal tax returns for the prior three fiscal years remain open subject to examination by the Internal Revenue Service.

Contingencies

In the normal course of business, the Portfolio may enter into contracts with service providers that contain general indemnification clauses. The Portfolio’s maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Portfolio that have not yet been made. However, based on experience, the Portfolio expects the risk of loss to be remote.

Other

Investment transactions are accounted for on trade date. Interest income is recorded on the accrual basis. Realized gains and losses from investment transactions are recorded on an identified cost basis. All discounts and premiums are accreted/amortized for both tax and financial reporting purposes.

The Portfolio makes an allocation of its net investment income and realized gains and losses from securities transactions to its investors in proportion to their investment in the Portfolio.

B. Fees and Transactions with Affiliates**Management Agreement**

Under the Investment Management Agreement with DWS Investment Management Americas, Inc. (“DIMA” or the “Advisor”), an indirect, wholly owned subsidiary of DWS Group GmbH & Co. KGaA (“DWS Group”), the Advisor determines the securities, instruments and other contracts relating to investments to be purchased, sold or entered into by the Portfolio.

Under the Investment Management Agreement with the Advisor, the Portfolio pays a monthly management fee based on its average daily net assets, computed and accrued daily and payable monthly, at the following annual rates:

First \$3.0 billion of the Portfolio’s average daily net assets	.1200%
Next \$4.5 billion of such net assets	.1025%
Over \$7.5 billion of such net assets	.0900%

Accordingly, for the six months ended June 30, 2021, the fee pursuant to the Investment Management Agreement was equivalent to an annualized rate (exclusive of any applicable waivers/reimbursements) of 0.096% of the Portfolio’s average daily net assets.

For the period from January 1, 2021 through June 30, 2021, the Advisor has voluntarily agreed to waive its fees and/or reimburse certain operating expenses to the extent necessary to maintain the total annual operating expenses (excluding certain expenses such as extraordinary expenses, taxes, brokerage and interest expense) at 0.08% of the Portfolio’s average daily net assets. This voluntary waiver or reimbursement may be terminated at any time at the option of the Advisor.

In addition, the Advisor has agreed to voluntarily waive additional expenses. This voluntary waiver may be changed or terminated at any time without notice. Under these arrangements, the Advisor waived certain expenses of the Portfolio.

For the six months ended June 30, 2021, fees waived and/or expenses reimbursed are \$12,752,751.

Administration Fee

Pursuant to an Administrative Services Agreement, DIMA provides most administrative services to the Portfolio. For all services provided under the Administrative Services Agreement, the

Portfolio paid the Advisor an annual fee (“Administration Fee”) of 0.03% of the Portfolio’s average daily net assets, computed and accrued daily and payable monthly. For the six months ended June 30, 2021, the Administration Fee was \$3,439,116, of which \$578,744 is unpaid.

Other Service Fees

Under an agreement with the Portfolio, DIMA is compensated for providing regulatory filing services to the Portfolio. For the six months ended June 30, 2021, the amount charged to the Portfolio by DIMA included in the Statement of Operations under “Reports to shareholders” aggregated \$400, all of which is unpaid.

Trustees’ Fees and Expenses

The Portfolio paid retainer fees to each Trustee not affiliated with the Advisor, plus specified amounts to the Board Chairperson and to each committee Chairperson.

C. Line of Credit

The Portfolio and other affiliated funds (the “Participants”) share in a \$350 million revolving credit facility provided by a syndication of banks. The Portfolio may borrow for temporary or emergency purposes, including the meeting of redemption requests that otherwise might require the untimely disposition of securities. The Participants are charged an annual commitment fee, which is allocated based on net assets, among each of the Participants. Interest is calculated at a daily fluctuating rate per annum equal to the sum of 0.10% plus the higher of the Federal Funds Effective Rate and the Overnight Bank Funding Rate, plus 1.25%. The Portfolio may borrow up to a maximum of 33 percent of its net assets under the agreement. The Portfolio had no outstanding loans at June 30, 2021.

D. Money Market Fund Investments and Yield

Rising interest rates could cause the value of the Fund’s investments — and therefore its share price as well — to decline. Conversely, any decline in interest rates is likely to cause the Portfolio’s yield to decline, and during periods of unusually low interest rates, the Portfolio’s yield may approach zero. A low interest rate environment may prevent the fund from providing a positive yield or paying fund expenses out of current income and, at times, could impair the fund’s ability to maintain a stable \$1.00 share price. Over time, the total return of a money market fund may not keep pace with inflation, which could result in a net loss of purchasing power for long-term investors. Recent and potential future changes in monetary policy made by central banks or governments are likely to affect the level of interest rates. Money market funds try to minimize this risk by purchasing short-term securities.

If there is an insufficient supply of U.S. government securities to meet investor demand, it could result in lower yields on such securities and increase interest rate risk for the fund.

E. Other – COVID-19 Pandemic

A novel coronavirus known as COVID-19, declared a pandemic by the World Health Organization, has caused significant uncertainty, market volatility, decreased economic and other activity, increased government activity, including economic stimulus measures, and supply chain interruptions. The full effects, duration and costs of the COVID-19 pandemic are impossible to predict, and the circumstances surrounding the COVID-19 pandemic will continue to evolve, including the risk of future increased rates of infection due to low vaccination rates and/or the lack of effectiveness of current vaccines against new variants. The pandemic has affected and may continue to affect certain countries, industries, economic

sectors, companies and investment products more than others, may exacerbate existing economic, political, or social tensions and may increase the probability of an economic recession or depression. The Portfolio and its investments may be adversely affected by the effects of the COVID-19 pandemic, and the pandemic may result in the Portfolio and its service providers experiencing operational difficulties in coordinating a remote workforce and implementing their business continuity plans, among others. Management will continue to monitor the impact COVID-19 has on the Portfolio and reflect the consequences as appropriate in the Portfolio's accounting and financial reporting.

This report is submitted for the general information of the shareholders of the ProFunds. It is not authorized for distribution to prospective investors unless preceded or accompanied by an effective prospectus. To receive the most recent month end performance information for each Fund, please call toll-free 888-776-5717.

A description of the policies and procedures that the ProFunds uses to determine how to vote proxies relating to portfolio securities is available without charge, upon request, by calling toll-free 888-776-3637; and on the Securities and Exchange Commission's website at sec.gov. Information regarding how the ProFund voted proxies relating to portfolio securities during the most recent 12-month period ended June 30 is available. (i) without charge by calling toll-free 888-776-3637; (ii) on the ProFunds' website at ProFunds.com; and (iii) on the Commission's website at sec.gov.

The ProFund discloses on the Adviser's website that it invests substantially all of its assets in the Portfolio and includes a link to the latest available listing of holdings in the Portfolio. In addition, the ProFund will file with the SEC on Form N-MFP, within five business days after the end of each month, more detailed portfolio holdings information. The ProFund's Form N-MFP filings will be available on the SEC's website, and the Adviser's website will contain a link to such filings.
